The office was annual, and as the first had been created on the 4th of the ides of December, that day was chosen for the election. In A.D. 1347, Nicolo di Rienzi assumed absolute power in Rome as tribune of the people, and reformed many abuses; but committing extravagances, he lost his popularity and was compelled to abdicate. The Troubadours were usually accompanied by *Jongleurs*, who sang their masters' verses, with the accompaniment of the guitar. The clergy strenuously exerted their influence for the purpose. A synod at Roussillon, 1027, decreed that none should attack his enemy between Saturday evening (at none) and Monday morning (at the hour of prime). First torches, then shells of fish sounded like trumpets, were the signals in primitive wars. *Potter*. The Jewish feast of trumpets was appointed 1490 B.C. (*Lev. xxiii. 24*). **TUBERCULOSIS**, a disease caused by the development of tubercles, small masses of diseased matter in the lungs (phthisis or consumption), in the face and other parts (lupus).

Dr. Robert Koch, of Berlin, discovered and isolated a minute organism, named *bacillus tuberculosis*, to whose action he attributed the disease, 15 Aug. 1881. In the autumn of 1890, he reported his invention of a lymph (see below, 15 Jan. 1891), by the injection of which into the system, as in vaccination, he hoped to cure the diseases. In Berlin he made many experiments on tuberculous guinea-pigs and human beings, with some success in respect to lupus, but not to phthisis. Dr. Koch was much honoured by the emperor, and was aided by the state. Dr. Koch's full account of his method was published in the *British Medical Journal*, London, 15 Nov., and other papers. Medical men flocked to Berlin from all parts of the world, to obtain the lymph. Exaggerated cases of successful application were published, and it soon appeared that time was required to test the efficacy of the remedy. Much discussion ensued. Dr. Koch, on 15 Jan. 1891, published the statement that his lymph, named *tuberculin*, was a glycerine extract from the pure cultivation of the tubercle bacilli.

**TÜBINGEN SCHOOL** of historico-philosophical theology was founded by professor F. C. Baur about 1835.

**TUBULAR BRIDGES.** The Britannia Tubular Suspension Bridge, then the most wonderful enterprise in engineering in the world, was constructed, 1846-50 (Mr R. Stephenson and Mr. Fairbairn, engineers), about a mile southward of the Menai Strait Suspension Bridge.\*

On the Britannia rock, near the centre of the Menai Strait, the surface of which is about ten feet above low water level, is built a tower two hundred feet above high water (commenced building,

\* The Britannia tubular bridge was intended to supply the place of one of the finest bridges in the kingdom; and the railway, of which the tubular bridge forms a part, is in like manner a substitute for one of the finest mail-coach roads ever constructed. The road from London to Holyhead was regarded as the highway from the British metropolis to Dublin; and the late Mr. Telford was applied to by the government to perfect this route by the London and Holyhead mail-coach road, which he did by erecting a beautiful suspension bridge over the river Conway and over the Menai Strait; commenced in July, 1818, and finished in July, 1825.

May, 1846), and on which rest two lines of tubes or hollow girders strong enough to bear their weight and laden trains in addition, the ends resting on the abutments on each shore, each tube being more than a quarter of a mile in length. The height of the tube within is thirty feet at the Britannia tower, diminishing to twenty-three feet at the abutments. The lifting of these tubes to their places was a most gigantic operation, successfully performed,

**TUESDAY**, in Latin *Dies Martis*, the day of Mars, the third day of the week, so called from *Tuisto*, *Tiw*, or *Tuesco*, a Saxon deity, worshipped on this day. *Tuisto* is mentioned by Tacitus; see *Week Days*.

**TUGENDBUND** ("league of Virtue"), formed in Prussia soon after the peace of Tilsit, June, 1807, ostensibly for relieving the sufferers by the late wars, and for the revival of morality and patriotism. Its head-quarters were at Königsberg. It excited the jealousy of Napoleon, who demanded its suppression in 1809. It was dissolved at the peace in 1815.

**TUILERIES** (Paris), the imperial palace of France, commenced by Catherine de Medicis, after the plans of Philibert de l'Orme, 1564; continued by Henry IV.; and finished by Louis XIV. This palace was stormed by the mob, 10 Aug. 1792; and ransacked in the revolutions of July, 1830, and Feb. 1848. Louis Napoleon made it his residence in 1851, and greatly renovated it. The restoration of the Tuileries (much injured by fire by the communists, May 1871) was determined on, Oct. 1872; not proceeded with. The ruins were sold for 32,200*l.* to M. Picard, 4 Dec. 1882.

**TULCHAN BISHOPS**; a mere nominal episcopacy set up in Scotland by the regent Morton, who, with other nobles, absorbed the larger portion of the revenue, 1572-3. *Tulchan* was a stuffed calf's skin set before a cow to facilitate milking.

**TULIPS**, indigenous in the east of Europe, came to England from Vienna about 1578. It is recorded in the register of Alkmaar in Holland, that in 1639, 120 tulips, with the offsets, sold for 90,000 florins: and that one, called the *Viceroy*, sold for 4203 guilders! The States stopped this ruinous traffic. The *tulip tree*, *Liriodendron tulipifera*, was brought to England from America, about 1663.

**TUMUT**, New South Wales, a small town on the Tumut river, a tributary of the Murrumbidgee, 264 miles S.W. of Sydney. It is the centre of a rich agricultural district, and mines are worked. Tumut was placed first on the list of places by the committee appointed to consider the choice of a site for the federal capital of Australia. Committee's selection rejected by the senate, Oct. 1903.

**TUNBRIDGE WELLS** (Kent). The springs were discovered, it is stated, by Dudley, lord North, who, when very ill, was restored to health by the use of the waters, 1606. The wells were visited by the queens of Charles I. and II., and by queen Anne, and soon became fashionable. Population, 1901, 35,000; 1909 (est.), 37,069.

**TUNGSTEN** (also called wolfram and scheelium), a hard whitish brittle metal. From tungstate of lead, Scheele in 1781 obtained tungstic acid, whence the brothers De Luyart in 1786 obtained the metal. In 1859 it was employed in making a new kind of steel.

**TUNIS** (N. Africa) stands nearly on the site of Carthage. Tunis was besieged by Louis IX., of France, who died near it 25 Aug. 1270. It remained under African kings till taken by Barbarossa, for Solymán the Magnificent, 1531. Barbarossa was expelled by the emperor Charles V., when 10,000 Christian slaves were set at liberty, June, 1535. The country was recovered by the Turks under Selim II. 1575. The bey of Tunis was first appointed in 1574; Tunis was reduced by admiral Blake, on the bey refusing to deliver up the British captives, 1655. The Hussein dynasty was founded 1705. In July, 1856, the bey agreed to make constitutional reforms. He died 22 Sept. 1859; and his brother and successor Mohamed-es-Sadok took the oath of fidelity to the constitution. He died, and was succeeded by his brother Sidi Ali, 28 Oct. 1882; died, 11 June, 1902; succeeded by his son Mohamed; succeeded by Mohamed en Nasir, 1906. Tunis made a French protectorate, 1882. Estimated total population, 2,030,000 (about 80,000 Europeans). Chief town Tunis (pop. 230,000, including 100,000 Moslems, 50,000 Jews, 52,150 Italians, 18,000 French). **TUNNAGE AND POUNDAGE** were ancient duties levied on every tun of wine and pound of other goods, imported or exported, and were the origin of our "customs." They commenced in England about 1346, and were granted to the kings for life, beginning with Edward IV. Charles I. gave great offence by levying them on his own authority, 1628. They were granted to Charles II. for his lifetime, 24 June, 1660. By the act 27 Geo. III. c. 13, these and other duties were repealed, 1787, and a new arrangement of excise and customs was introduced.

**TUNNELS**, for drainage, are ancient. The earliest tunnel for internal navigation was executed by M. Riguët, in the reign of Louis XIV., at Bezieres in France. The first in England was by Mr. Brindley, on the duke of Bridgewater's canal, near Manchester, about 1766. Project of the Gravesend tunnel, 1800—the report upon it, 1801. The Thames Tunnel was projected by Mr. Brunel in 1823, and opened for foot passengers, 25 March, 1843; see *Thames Tunnel*. Innumerable tunnels have been made for railways. The railway tunnel at Liverpool was completed in the middle of 1829, lit up with gas, and exhibited once a week. See *Alps* (Mont Cenis, etc.) and *Thames*.

**TURBINES.** The first steam turbine-fitted vessel, the *Turbinia*, was constructed by the hon. C. A. Parsons at his works at Newcastle-on-Tyne. The *Turbinia*, a small vessel, 100 ft. in length, underwent her first trial 4 Nov. 1894. The system rapidly developed, owing to the increased speed of the vessels fitted with turbine engines, and the economy effected in coal by their use; improvements being made in their construction and the application of the system to various types of ships, including liners and vessels of the royal navy. The turbine-driven torpedo-boat-destroyer *Piper* was lost off the Channel Islands in 1896; and the t.-b.-d. *Cobra* suffered a similar fate in the North Sea in 1907. The first Clyde passenger-ship, *King Edward*, was built in 1901, followed by the *Queen Alexandra* and the *Princess Maude*, 1903. The first turbine ss. for the Atlantic passenger service, the Allan line *Victorian*, 16,000 tons gross, was launched in 1904; and in the same year a sister ship, owned by the same line, the *Titanic*, 11,000 tons gross, was also launched. The *Virginian* crossed the Atlantic in 4 days 4 hrs., following for difference in British and Canadian time; she left Moville 2 p.m. 9 June, and passed Cape Race, Newfoundland, 11 p.m. on 13 June, 1905. The *Carmania*, a Cunarder, 21,000 tons gross, 21,000 indicated h.p., with a speed of 21 knots, fitted with turbines, with accommodation for 2,656 passengers, was launched 21 Feb. 1905, and on her trial trips attained a speed of 19½ knots in a prolonged run. Other large liners and war vessels driven by turbines have since been constructed. See also *Shipping*, *Steam Engine*, and *Navigation*, *Navy*, and *Addenda*.

New American Scout Cruisers.—The Parsons turbine wins, in a 24 hours' speed test to determine the relative efficiency and coal consumption of varying types of engines, by 12 miles, maintaining an average speed of 25½ knots, over a course of 280 miles between Block Island and Sandy Hook . . . 14 April, 1909

**TURIN**, the ancient Augusta Taurinorum in Piedmont, capital of the Sardinian States, and of the kingdom of Italy, till 1864, when it was superseded by Florence. Its importance dates from the permanent union of Savoy and Piedmont in 1416. The French besieged this city; but prince Eugène

defeated their army, and compelled them to raise the siege, 7 Sept. 1706. In 1798, the French republican army took possession of Turin, seized all the strong places and arsenals of Piedmont, and obliged the king and his family to remove to the island of Sardinia. In 1799, the French were driven out by the Austrians and Russians; but the city and all Piedmont surrendered to the French, June 1800. In May 1814, it was restored to the king of Sardinia; see *Italy*, 1864. Here prince Humbert was married to his cousin Margherita amidst great rejoicing, 22 April, 1868. The monument to Cavour was inaugurated, 8 Nov. 1873. An exhibition opened by the king, 29 April, 1881; another opened by the king, 1 May, 1898. Monuments to prince Amadeus of Savoy (ex-king of Spain) and to king Humbert, inaugurated, 7, 8 May. Internat. art exhibition opened by the king, 10 May; closed, 12 Nov. 1902. See *Treaties*, and *Italy*, 1884. Population, 1900, 335,539; 1910 (est.), 375,000.

**TURKESTAN**, called by the Persians Turan, formerly Independent Tartary (*which see*), the original country of the Turks, in Central Asia, was reached by Alexander, 331 B.C., and has since undergone many changes, forming successively part of the empires of Genghis Khan and Tamerlane (see *Tartary*). For Eastern or Chinese Turkestan, see *Kashgaria*; for Western, see *Bokhara* and *Khiva*. The Russians gradually encroached on this country; on 14 Feb. 1865, a new province, Turkestan, was created by decree, and gen. Kauffmann made governor, 26 July, 1867; died 16 May, 1882. The rule of the czar accepted by the chief tribes at Merv (*which see*), announced 8 Feb. 1884. Gen. Dukhowski appointed gov.-gen. of Turkestan and the Transcaspian territory, April, 1898. **TURKEY.** The Turks were originally a tribe of Tartars; but, by incorporation with the peoples they have conquered, have become a mixed race. About 760, they obtained possession of a part of Armenia, called from them *Turcomania*. They gradually extended their power; but in the 13th century, being harassed by other Tartar tribes, they returned to Asia Minor. The Turkish empire till 1878 comprehended the almost independent principalities of Moldavia and Wallachia, Servia, and Montenegro, the hereditary vice-royalty of Egypt, and Tunis. The Turkish quadrilateral for-

tresses were Shumla, Varna, Silistria, and Rustchuck. The population of the empire was estimated in 1887 at 32,978,100; (immediate Possessions, 21,633,000, tributaries and protectorates, 11,345,100); in Europe, 8,987,000; Asia, 16,174,100; Africa, 7,817,000; 1901, in Europe, about 6,000,000; total, including Asia, &c., about 39,732,000. By the treaty of Berlin (13 July, 1878) Turkey was said to have

	Square Miles.	Inhabitants.	Mohammedans.
Ceded to Roumania	5,935	246,000	142,000
" Servia	4,326	264,000	75,000
" Montenegro	1,549	40,000	9,000
" Austria	15	2,000	—
" Greece	5,300	750,000	49,000
To be occupied and administered by Austria	28,125	1,061,000	513,000
Formed into the Principality of Bulgaria	24,404	1,773,000	681,500
Included in Eastern Roumelia.	13,646	746,000	265,000

If the provinces "indefinitely" to be occupied by Austria, Bulgaria, and Eastern Roumelia are excluded, there remain to Turkey in Europe only 74,790 square miles, with 4,779,000 inhabitants, of whom 2,521,500 are Mohammedans. In Armenia Russia takes 10,000 square miles, with about 350,000 inhabitants. Cyprus, entrusted to the keeping of England, has an area of 3,584 square miles, and 237,000 inhabitants in 1901. Thessaly ceded to Greece by convention, 24 May; treaty signed, 2 July, 1881. The Ottoman Empire now consists of about 66,500 sq. miles in Europe, 680,000 sq. miles in Asia, and 400,000 sq. miles in Africa. The estimated population, 1910, being 30,000,000. See *Greco-Turkish War*, May, 1897.

 Turner, a great landscape painter, was born in April,  
 1775, and died 19 Dec. 1851. He bequeathed to the  
 nation all the pictures and drawings collected by  
 him and deposited at his residence, 47, Queen Anne-  
 street, London, on condition that a suitable gallery  
 should be erected for them within ten years; and  
 directed his funded property to be expended in  
 founding an asylum at Twickenham for decayed  
 artists. The will was disputed by his relatives, but  
 a compromise was made. The oil-paintings (100 in  
 number) and the drawings (1,400) were obtained by  
 the nation, and the engravings and some other pro-  
 perty were transferred to the next of kin. The  
 drawings were cleaned and mounted under the  
 careful superintendence of Mr. Ruskin, and the  
 pictures were sent to Marlborough-house for ex-  
 hibition. In 1861, many of the pictures were re-  
 moved from the South Kensington Museum to the  
 National Gallery, others in 1869. The sketches,

One of the collectors, acting with indecent rudeness to Wat Tyler's daughter, was struck dead by the father, June, 1381. His neighbours took arms, and in a short time almost the whole of the population of the southern and eastern counties rose, extorting freedom from their lords, and plundering. On 12 June, 1381, they gathered upon Blackheath to the number of 100,000 men, and on 14 June murdered Simon of Sudbury, archbishop of Canterbury, and sir Robert Hales, the royal treasurer. The king, Richard II., invited Tyler to a

parley, which took place on the 15th at Smithfield, where the latter addressed the king in a menacing manner, now and again lifting up his sword. On this the mayor, Walworth, stunned Tyler with a blow of his mace, and one of the king's knights named Cavendish, dispatched him. Richard temporised with the multitude by promising a charter, and thus led them out of the city, when sir R. Knollys and a band of knights attacked and dispersed them with much slaughter. The insurrection in Norfolk and Suffolk was subdued by the bishop of Norwich, and 1500 of the rebels were executed.

**TYPE-WRITERS.** M. Foucault sent to the Paris exhibition of 1855, a writing-machine for the blind; and several were invented by Wheatstone. After successive improvements, Messrs. Remington, in America, in 1873, contracted to construct 25,000. The standard speed is between 60 and 70 words per minute, the record 203. Many other types are in existence, including the Yost, Hammond, Oliver, Simplex, Bar-lock and Smith-Premier.

**TYRANT.** In early Greek history, the term was applied to any man who governed with irresponsible power. Solon objected to the term, and chose the name Archon (ruler), 594 B.C. The earliest tyrants were those at Sicily, beginning with Cleisthenes, in the 7th century B.C. Tyranny declined in Greece about 490 B.C., and revived after the close of the Peloponnesian war, 404 B.C.; see *Thirty Tyrants*.

**TYRE** (Phœnicia), a great city, said to have been first built by Agenor. Another city was built 1257 (about 2267, *Hales*) B.C. It was besieged by

the Assyrians, who retired from before it, after a siege of upwards of five years, 713 B.C. Taken by Nebuchadnezzar, 572 B.C., and the city demolished, when the Tyrians removed to an opposite island, and built a new and magnificent city. It was taken by Alexander with much difficulty, after a siege of seven months, July, 332 B.C. He joined the island to the continent by a mole. *Strabo*. Tyre was captured by the Crusaders, 7 July, 1124; by the French, 3 April, 1799; and by the allied fleet, during the war against Mehemet Ali, 1841.

**TYRE, ERA OF**, began on 19 Oct. 125 B.C., with the month of Hyperberetæus. The months were the same as those used in the Grecian era, and the year is similar to the Julian year. To reduce this era to ours, subtract 124; and if the given year be less than 125, deduct it from 125, and the remainder will be the year before Christ.

**TYROL**, the eastern part of ancient Rætia, now a province of the Austrian empire, was ceded to the house of Hapsburg in 1363 by Margaret, the heiress of the last count. It became an appanage of the younger (or Tyrol) branch of the imperial house, which came to the throne in the person of Maximilian II., in 1618. The French conquered the Tyrol in 1805, and united it to Bavaria; but in 1809 an insurrection broke out, headed by Andreas Hofer, an innkeeper, who drove the Bavarians out of the Tyrol, thoroughly defeated some French detachments, but laid down his arms at the treaty of Vienna. He was subsequently accused of corresponding with the Austrians, captured and sent to Mantua, and there shot by order of the French government, 20 Feb. 1810. The Austrian emperor ennobled his family in 1819, and erected his statue in Innsbruck in 1834; another statue on the Iselberg was unveiled in the presence of the emperor Francis Joseph, 28 Sept. 1893. The Tyrolese riflemen were very effective in the Italian war in 1859. The Arlberg tunnel railway from Innsbruck to Bregenz inaugurated by the emperor 20 Sept. 1884. Population in 1890, 812,696; 1900, 850,062; 1910 (est.), 991,750.

were defeated with dreadful loss by marshal Ney, Ulm surrendered with 28,000 men, the flower of the Austrian army, 17-20 Oct. 1805. The cathedral was built 1377-1494; the spire, 530 feet high, said to be the loftiest in the world, was completed Aug. 1894, with great rejoicings. Pop. 1905, 51,820.

**ULSTER**, the N. division of Ireland. After the death of Strongbow, 1176, John de Courcy was made earl of Ulster; Hugh de Lacy was earl, 1243; and Walter de Burgh, 1264; whose descendant, Elizabeth, married Lionel, son of Edward III., 1352. He thus became earl of Ulster. In 1611, the British colonisation of the forfeited lands (termed the *Ulster settlements* or *plantations*) began, much land being granted to the corporation of London; see *Irish Society*. The consequent rebellion of the Irish chieftains, Roger More, Phelim O'Neale, McGuire, earl of Inniskillen, and others, broke out on 23 Oct. 1641 (see *Ireland*).—*Ulster King of Arms* appointed for Ireland, 1553.—By the ancient "Ulster tenant-right," the outgoing tenant of a farm received from his successor a sum of money for the privilege of occupancy. A modified form of this right was adopted in the Irish land act, passed 8 July, 1870.

The **ULSTER CONVENTION**, proposed 2 April, met at Belfast 17 June, 1892, in a large pavilion erected for the purpose. 12,000 delegates of various classes and opinions, from all parts of the province, with many other persons, were present. The duke of Abercorn being in the chair. The proceedings, which were of a grave, earnest character, began with a prayer and the singing of part of psalm xli. Five resolutions for firmly maintaining the Union of Great Britain and Ireland in opposition to the scheme for home rule were passed unanimously.

**ULTRAMONTANISTS** (from *ultra montes*, beyond the mountains), a term originally applied in France to those who upheld the extreme authority of the pope in opposition to the freedom of the Gallican church, which had been secured by various bulls, and especially by the concordat of 15 July, 1801. Ultramontanists now are those who maintain the official infallibility of the bishop of Rome

**ULUNDI**, Zululand, South Africa. On 4 July, 1879, the Zulus, commanded by their king, Cetshwayo, who had refused the conditions of peace, were totally defeated near here by lord Chelmsford, after a severe conflict. Capt. Wyatt-Edgell, 17 Lancers, and 9 men were killed, and about 53 wounded. The British were attacked in the open country by the Zulus, who enveloped our hollow square and charged on all sides up to within 60 yards, when they broke and fled under the heavy fire. They were pursued and routed by cavalry. About 23,000 Zulus engaged, 1,500 killed. The British showed much firmness and the Zulus displayed great courage. The royal kraal at Ulundi and other military kraals were burnt.

**UMBRELLA**, described in early dictionaries as "a portable pent-house to carry in a person's hand to screen him from violent rain or heat."

Umbrellas appear in the carvings at Persepolis. Niebuhr saw a great Arabian prince returning from a mosque, he and each of his family having a large umbrella carried by his side. Old chinaware shows the Chinese shaded by umbrellas. It is said that the first person who generally used an umbrella in the streets of London was the benevolent Jonas Hanway, who died in 1786.

John Macdonald, a footman, who wrote his own life, informs us that he had "a fine silk umbrella, which he brought from Spain; but he could not with any comfort to himself use it, the people calling out, 'Frenchman! why don't you get a coach?'" The hackney-coachmen and chairmen were clamorous against their rival. The footman says he "persisted for three months, till they took no further notice of this novelty. Foreigners began to use theirs; and then the English." 1778.

**UNIFORMITY ACTS.** That of 2 & 3 Edward VI., 15 Jan. 1549, ordained that the order of divine worship, drawn up by Cramer and others, "with the aid of the Holy Ghost," should be the only one used after 20 May. The penalties for refusing to use it were fine and imprisonment. This act was confirmed in 1552, repealed by Mary, 1554; and re-enacted by Elizabeth in 1559. The act of Uniformity, 14 Charles II. c. 4, was passed in 1662. It enjoined uniformity in matters of religion, and obliged all clergy to subscribe to the thirty-nine articles, and use the same form of worship, and same book of common prayer. Its enforcement on 24 Aug. 1662, termed Black Bartholomew's day, caused, it is said, upwards of 2000 ministers to quit the church of England. This day was commemorated by dissenters in 1862. The Act of Uniformity Amendment act, whereby shortened services were authorised, and other changes made, was passed 18 July, 1872. The *Uniformity of Process* act, which made many law changes, was passed 23 May, 1832.

**UNIFORMS.** Military uniforms were first used in France, "in a regular manner" by Louis XIV. about 1668. In England the uniform was soon afterwards adopted in the military service, but with little analogy to the modern dress. See under *Navy*.

UNIGENITUS, see *Bull*.

**UNINFLAMMABLE SALTS.** At the British Association, 15 Sept. 1859, MM. Versmann and Oppenheim announced their discovery that fabrics steeped in solutions of tungstate of soda, or sulphate or phosphate of ammonia, burn without flame.

**UNION CHARGEABILITY ACT,** providing for the better distribution of the charge for relieving the poor in unions, was passed in June, 1865. One object of the act is the improvement of the dwellings of agricultural labourers.

## UNION OF CALMAR, 1397; of Utrecht, 1579.

**UNION OF ENGLAND AND SCOTLAND** by the accession of James VI. of Scotland as James I. of England, 24 March, 1603. The legislative union of the two kingdoms (as Great Britain) was attempted, but failed in 1604 and 1670; in the reign of Anne, commissioners were appointed, the articles discussed, and, notwithstanding a great opposition made by the Tories, every article in the union was approved by a great majority, first in the house of commons, and afterwards by the peers, 22 July, 1706; was ratified by the Scottish parliament, 16 Jan. 1707, and became law, 1 May, same year.

UNION GÉNÉRALE, see *France*, Dec. 1882.

## UNION OF GREAT BRITAIN AND IRELAND effected, 1 Jan. 1801.

Proposed in the Irish parliament, 22 Jan. 1799.  
Repealed by the commons of Ireland, the votes being 105 for, to 101 against the union, 24 Jan. 1800.  
Passed, 7 June, 1800.  
The English house of commons on the same question divided, 140, 141, and 140, for the union; against it, 15, 25, and 28 respectively. "  
Lord Castlereagh detailed his plan of the union, in the Irish house of lords, founded on the resolutions of the British parliament thereon 5 Feb. "  
Votes of the commons agreeing to it, 161 against 115, 17 Feb.; and again, 152 against 108 21 Feb. "  
The houses of lords and commons wait on the lord-lieutenant with the articles of union, 27 March, "

The act passed in the Irish parliament, 13 June, and in the British parliament 2 July, 1800.  
The imperial united standard first displayed at the tower of London, and upon Bedford Tower, Dublin Castle, on the act of legislative union becoming an operative law 1 Jan. 1801.  
For attempts to dissolve this union, see *Repeal, Ireland*, 1886.

**UNION JACK.** The original flag of England was the banner of St. George, *i.e.*, white with a red cross, which, 12 April, 1606 (three years after James I. ascended the throne) was incorporated with the banner of Scotland, *i.e.*, blue with a white diagonal cross. This combination obtained the name of "Union Jack," in allusion to the union with Scotland, and the word Jack is considered a corruption of the word Jacobus, Jacques, or James. This arrangement continued until the union with Ireland, 1 Jan. 1801, when the banner of St. Patrick, *i.e.*, white with a diagonal red cross, was amalgamated with it, and forms the present Union flag. Mansion house meeting in aid of a "Union Jack" club in memory of the soldiers and sailors who died in the S. African war, 25 Feb. 1903. This club has been largely subscribed to, rooms and cots being endowed by various regiments.

**UNION JACK CLUB,** Waterloo-road, S.E. The club founded by subscription at a cost of 80,000*l.* for the use of soldiers, sailors, and marines, and as a national memorial to those men of the services who had lost their lives in the South African and Chinese wars, was opened by king Edward, accompanied by queen Alexandra, 1 July, 1907.

**UNION RELIEF ACT,** passed in 1862, continued in 1863, to enable boards of guardians of certain unions to obtain temporary aid to meet the extraordinary expenditure for relief occasioned by the distress in the cotton manufacturing districts.

**UNIONISTS.** A Spanish political party, long headed by marshal Serrano. In 1869 they advocated the election of the due de Montpensier as king. See *Progresistas and Spain*, *Home Rule, Ireland*, &c.

**UNIT,** a gold coin, value 20s., issued by James I. in 1604.

**UNITARIANS,** termed Socinians from Lælius Socinus, who founded a sect in Italy about 1546. They profess to believe in and worship one only self-existent God, in opposition to those who worship the Trinity in unity. They consider Christ to have been a mere man; and do not admit the need of an atonement or of the complete inspiration of the Scriptures. Michael Servetus printed a tract in disparagement of the doctrine of the Trinity. In 1553, proceeding to Naples through Geneva, Calvin induced the magistrates to arrest him on a charge of blasphemy and heresy. Servetus, refusing to retract his opinions, was condemned to the flames, which sentence was carried into execution, 27 May, 1553. Servetus is numbered among those anatomists who made the nearest approach to the doctrine of the circulation of the blood, before Harvey estab-

lished that doctrine. Matthew Hamont was burnt at Norwich for asserting Christ not to be the Son of God, 1 June, 1579. The Unitarians were numerous in Transylvania in the 17th century; they came to England about 1700, and many of the original English presbyterian churches became Unitarian about 1730. They were not included in the Toleration act till 1813. Their tenets resemble those of the Arians and Socinians (*which see*). The Unitarian marriage bill was passed, June, 1827. In Dec, 1833, by a decision of the vice-chancellors the Unitarians (as such) lost the possession of lady Hewley's charity; the decision was affirmed on appeal in 1842. *British and Foreign Unitarian Association* founded, to promote Unitarianism, 1825. There were 229 congregations in England in 1851. Returns for 1909 show 372 Unitarian churches and places of worship in Great Britain and Ireland; in England, 293, places of worship; in Wales, 34; in Scotland, 7; and in Ireland 38. The total number of recognised ministers is 373. The rev. Dr. Martineau, LL.D., an eminent preacher and writer, died, aged 94, 11 Jan. 1900. The internat. Unitarian council met in Geneva, 1905. Ninth triennial unitarian conference at Oxford, 17 April, 1906.

### UNITED BRETHREN, *see Moravians.*

**UNITED IRISHMEN**, a political society founded in 1791, was at first loyal, but afterwards met secretly, to establish a republic, became active in 1795. Theobald Wolf Tone, the founder, was captured by sir John Warren in the *Hoche*, one of six frigates destined to support the rebellion, in Oct. 1798. He anticipated his punishment by suicide in prison Nov. 1798.

**UNITED KINGDOM.** England and Wales were united in 1283; Scotland to both in 1707; and the British realm was named the United Kingdom on the union of Ireland, 1 Jan. 1801; *see Union* and article *Population*—The UNITED KINGDOM ALLIANCE, for the total suppression of liquor traffic, was founded, 1 June, 1853. *See Permissive Bill.* The subscribed manifesto of this alliance occupied a page of the *Times*, 11 Dec. 1871. Annual reports. United Kingdom Beneficent Association, founded 1863, grants annuities to poor persons of a better class.

**UNITED PRESBYTERIAN CHURCH**, in Scotland, was formed 13 May, 1847, *see Burghers and Relief Church.* The United Presbyterians formed a union with the Free Church of Scotland (*which see*), 31 Oct. 1900, the two bodies now being designated the United Free Church of Scotland.

**THE UNITED SERVICE MUSEUM** was founded by His Majesty King William IV., on 25 June, 1831, as "The Naval and Military Library and Museum." In 1895 the Museum was transferred to its present building, which is the Banqueting House of Old Whitehall Palace, and the scene of the execution of King Charles I. The ceiling of the building was painted by Rubens, and is very fine. The Museum contains many interesting models of battles, and also possesses countless naval and military relics, models of ancient and modern war vessels; collections of arms of all periods, and various other exhibits.

**UNITED STATES OF AMERICA** were so styled by the congress of the revolted British

provinces, 9 Sept. 1776. Their flag was declared to be thirteen stripes, alternately red and white and thirteen stars in a blue field, corresponding with the then number of states of the union, 20 June, 1777. There are now (1910) 46 states, *i.e.*, 13 original states, 7 which were admitted without having previously been organized as territories, and 26 which had been territories; the territory of Alaska and the island of Hawaii. Area, 3,622,900 square miles. The government of the United States is a pure democracy. Each of the states has a separate and independent legislature for the administration of its local affairs, but all are ruled in matters of imperial policy by two houses of legislature, the senate, elected for six years, and the house of representatives (391 in 1910) elected for two years, to which delegates are sent from the different members of the confederacy. The president of the United States is elected every fourth year by the free voice of the people. He and his ministers have no seat in the legislative assemblies. His veto may be nullified by the vote of two-thirds of the house. The election of Abraham Lincoln as president on 4 Nov. 1860, was followed by the secession of eleven slaveholding states, and led to the great civil war, 1861-5; *see Confederates, English Language, Cuba, 1898.*

**URANUS**, a planet discovered by sir William Herschel, 13 March, 1781, first called Georgium Sidus, after George III.; next Herschel; and, finally, Uranus. It is about twice as distant from the sun as the planet Saturn. The anniversary of its first revolution (in 84 years 7 days) since its discovery, was celebrated on 20 March, 1865. Its perturbations led to the discovery of Neptune, in 1846. Uranus has 4 satellites; 2 discovered by Herschel in 1787, and 2 by Lassell, 1 of which almost simultaneously by Struve, in 1847. Herschel was mistaken in supposing that he had discovered other satellites, 2 in 1790 and 2 in 1794; they were probably faint stars.

**URBINO**, the ancient Urbinum Hortense, central Italy, capital of a duchy created for Malatesta, 1474. **USES, STATUTE OF**, 27 Hen. VIII. c. 10 (1535-6); see *Charitable Uses*.

**USHANT**, an island near Brest, N.W. France, near which two naval battles were fought between the British and French fleets.

(1.) On 27 July, 1778, after an indecisive action of three hours, the French, under cover of the night, withdrew into the harbour of Brest. Admiral Keppel commanded the English fleet; the count d'Orvilliers the French. The failure of a complete victory was attributed to admiral sir Hugh Palliser's non-compliance with the admiral's signals. Palliser preferred articles of accusation against his commander, who was tried and acquitted, and the charge against him declared to be "malicious and ill-founded."

(2.) Lord Howe with 25 ships signally defeated the French fleet (26 ships, under Villaret-Joyeuse), taking six ships of the line, and sinking one (the *Vengeur*), 1 June, 1794. While the two fleets were engaged in this action, a large fleet of merchantmen, on the safety of which the French nation depended for its means of prosecuting the war, got safely into Brest

\* Various French histories, on the authority of the French demagogue Barrère, state that the English had 36 ships of the line, and the French only 26, and that the crew of the *Vengeur* sang the *Marseillaise* while the ship sank, displaying the tricolor flag. All this was denied in 1802, and disproved by rear-admiral Griffith in Nov. 1838. The *Vengeur* surrendered to the British, who exerted themselves to save the crew. The French statement was accepted by Alison, and at first by Carlyle, but afterwards contradicted by both.

harbour, which gave occasion to the enemy to claim the laurels of the day, notwithstanding their loss in ships, and in killed and wounded, which was very great. The day was long termed in England the "glorious first of June."

**USURY** from a stranger was permitted to the Jews, but forbidden from their brethren, 1491 B.C. (*Exod.* xxii. 25, *Deut.* xxiii. 13.) This law was enforced by Nehemiah, 445 B.C. (*Neh.* v.) Usury was prohibited by the English parliament, 1341. Until the 15th century, no Christians were allowed to receive interest of money, and Jews were the only usurers, and therefore often banished and persecuted; see *Jews*. By the 37th of Henry VIII. the rate of interest was fixed at 10 per cent., 1545. This statute was repealed by Edward VI., but re-enacted 13 Eliz. 1570. For later legislation, see *Interest*.

**UTAH**, a western territory of North America, was organised 9 Sept. 1850; the capital, Salt Lake City, became the chief seat of the *Mormonites* (*which see*). Population in 1880, 143,963; 1900, 276,749; 1910 (est.), 400,000. Salt Lake city, 1890, 44,843; 1910 (est.), 100,000.

**UTICA** (N. Africa), an ancient Tyrian colony, an ally of Carthage, named in the treaty with the Romans 348 B.C. Here Cato the younger, after the defeat of the partisans of Pompey at Thapsus, committed suicide, 46 B.C. Utica flourished greatly after the fall of Carthage, and was made a Roman city by Augustus on account of its favouring Julius Cæsar. It suffered by the invasion of the Vandals, 439; and of the Saracens, about 700. See *New York*, 1895.

**UTILITARIANISM**, termed the "greatest happiness principle," the philosophy which proposes the attainment of the greatest happiness of the greatest number; a doctrine ascribed to Priestley by Bentham. The doctrine is found in the writ-

ings of Locke, Hartley, Hume, and Paley; but was chiefly propounded by Jeremy Bentham in his "Introduction to the Principles of Morals and Legislation," 1780-89, by John Stuart Mill, who died 9 May, 1873, and by sir Edwin Chadwick, who died 5 July, 1890. Mill founded a small "utilitarian society," in 1822. He took the name from an expression in Galt's "Annals of the Parish."

**UTOPIA**, the name given by sir Thomas More to an imaginary isle, representing the "best state of a public weale," described in a book written in Latin, published 1548. The work is considered to be an ironical satire on the state of Europe at the time, Utopia signifying "Nowhere." An English translation was published in 1551; the rev. J. H. Lupton's edition was published by the Clarendon Press, Nov. 1895. For the loss of the *Utopia*, emigrant steamer, see *Wrecks*, 17 March, 1891.

**UTRECHT** (the Roman *Trajectum ad Rhenum*) became the seat of an independent bishopric about 695. The last prelate, Henry of Bavaria, weary of his turbulent subjects, sold his temporal government to the emperor Charles V. in 1528. The union of the Seven United Provinces began here (see *United Provinces*); signed 23 Jan. 1579; 300th anniversary celebrated 23 Jan. 1879. The *treaty of Utrecht*, which terminated the wars of queen Anne, was signed by the ministers of Great Britain and France, and all the other allies, except the ministers of the empire, 11 April, 1713. This treaty secured the Protestant succession in England, the separation of the French and Spanish crowns, the destruction of the works of Dunkirk, the enlargement of the British colonies and plantations in America, and a full satisfaction for the claims of the allies. Utrecht surrendered to the Prussians, 9 May, 1787; was acquired by the French, 18 Jan. 1795, and restored at the peace, 1814. Population, 1887, 81,398; 1900, 104,194; 1910 (est.), 120,500.

**UXBRIDGE** (W. Middlesex). On 30 Jan. 1645, commissioners met here to discuss terms of peace between Charles I. and the parliament; they separated without effect, 22 Feb. The latter required absolute control of the army and navy, the abolition of the episcopacy, liturgy, &c.

VACATIONS, *see Terms.*

**VACCINATION** (from *Variola Vaccina*, the cow-pox), discovered by Dr. Edward Jenner. He was born in 1749, and educated for the medical profession, partially under John Hunter. Having heard that milkmaids who had had the cow-pox never took the small-pox, he, about 1780, conceived the idea of vaccination. He made the first experiment by transferring to a healthy child on 14 May, 1796, the pus from the pustule of a milkmaid who had caught the cow-pox from the cows. He announced his success in a memoir published 1798, and vaccination, begun 21 Jan. 1799, soon became general, after much opposition. For this Dr. Jenner received 10,000*l.* from parliament, 2 June, 1802, and 20,000*l.* in 1807. The first national institution for vaccination, the Royal Jennerian Institution, was founded 19 Jan. 1803. The emperor Napoleon valued Dr. Jenner so highly, that he liberated Dr. Wickham, when a prisoner of war, at Jenner's request, and subsequently whole families of English, making it a point to refuse him nothing that he asked. Vaccination, although much opposed, was practised throughout all Europe previously to 1816. Dr. Jenner died suddenly, 26 Jan. 1823.

**VACUUM**, is produced by reducing the pressure of the atmosphere, whereby its power of absorbing moisture is greatly increased. The Aristotelian philosophers asserted that "nature abhors a vacuum." It has been proved that an absolute vacuum cannot be obtained by the air pump, a small residuum of gaseous matter remains after extreme exhaustion. To study the effects of the projection of an electric discharge upon this matter, prof. W. Crookes (knt. June, 1897) invented his celebrated *vacuum tubes*, which he exhibited with interesting experiments at the Royal Institution, 4 April, 1879. At the same place, on 21 Jan. 1881, Dr. Warren De La Rue exhibited splendid results which he had obtained with the assistance of Dr. Hugo Müller, by means of an electric discharge from a battery of 14,400 chloride of silver cells into vacuum tubes. *See Röntgen Rays*. 32 forms of vacuum tubes are described in *Nature*, 28 Jan. 1897. The power of absorbing moisture possessed by a vacuum has been utilised by M. Emil Passburg, of Breslau, in his drying apparatus which has been successfully employed for drying grains by Messrs. Guinness, of Dublin, since the spring of 1888.

**VADIMONIS LACUS**, the Vadimonian lake, Umbria, central Italy, near which the Etruscans were totally defeated in two severe engagements by the Roman consuls: 1, by Fabius Maximus, 309 B.C.; 2, by Cornelius Dolabella, 283.

**VAGRANTS.** By law, after being whipped, a vagrant was to take an oath to return to the place where he was born, or had last dwelt for three years, 1530. A vagrant a second time convicted was to lose the upper part of the gristle of his right ear, 1535; a third time convicted, death. A vagabond to be branded with a V, and be a slave for two years, 1547. If he absconded and was caught, he was to be branded with S, and be a slave for life. Vagrants were punished by whipping, gaoling, boring the ears, and death for a second offence, 1572. The milder statutes were those of 17 Geo. II.; 32, 35, and 59 Geo. III. The present Vagrant Act (5 Geo. IV. c. 83) was passed in 1824; amendment act passed, 12 Aug., 1898. *See under Poor.*

**VALENÇAY**, a château near Châteauroux, central France, where Napoleon I. imprisoned Ferdinand of Spain from 1808 to 1813. His kingdom was restored to Ferdinand by a treaty signed 8 Dec. 1813.

Its university, founded, it is said, in the 13th century, was revived in the 15th. Valencia was taken by the earl of Peterborough in 1705, but submitted to the Bourbons after the unfortunate battle of Almanza, in 1707. It resisted the attempts made on it by marshal Mouncey, but was taken from the Spaniards with a garrison of more than 16,000 men, and immense stores, by the French under Suchet, 9 Jan. 1812. Population of the city, 1887, 170,763; 1897, 204,768; 1910 (est.), 244,503.

It was besieged from 23 May to 28 July, 1793, when the French garrison surrendered to the allies under the duke of York. It was retaken, together with Condé, by the French, 27-30 Aug. 1794; on capitulation, the garrison and 1,100 emigrants were made prisoners, with immense stores.

**VALENTIA**, a Roman province, including the country between the walls of Severus and Adrian, was reconquered from the Picts and Scots by Theodosius, and named after Valentinian I. the reigning emperor, 368.

**VALENTINE'S DAY** (14 Feb.). Valentine is said to have been a bishop, who suffered martyrdom under Claudius II. at Rome; others say under Aurelian, in 271. 618,000 letters passed through the post-office on 14 Feb. 1856. 530,300 was the estimated number of valentines delivered in 1864; in 1870, 1,545,755. The custom has now almost ceased. See *Post*.

**VALENTINIANS**, followers of Valentine, a priest, who, on being disappointed of a bishopric, forsook the Christian faith, declaring there were thirty gods and goddesses, fifteen of each sex, which he called *Æones*, or *Agēs*. He taught in the 2nd century, and published a gospel and psalms: his followers added other errors.

**VALLADOLID** (Spain), the Roman *Pintia* and the Moorish *Belad Walid*: was recovered for the Christians by Ordoño II., the first king of Leon, 914-23. It became capital of Castile in the 15th century. It was taken by the French Jan. 1808; and captured by the English, 4 June, 1813. Here died Christopher Columbus, 20 May, 1506. Population, 1887, 62,012; 1910 (est.), 80,000.

**VALLOMBROSA** (Central Italy). A Benedictine abbey was founded here by John Gualbert, about 1038. The monks were termed Vallombrosians.

**VALMY** (N.E. France). Here the French, commanded by Kellermann, defeated the Prussians, commanded by the duke of Brunswick, 20 Sept. 1792. The victory was of immense moral advantage to the republicans; and Kellermann was made duke of Valmy in 1808.

**VALOIS**, a county (N. France) given by Philip III. to his younger son Charles, whose son Philip became king as Philip IV. in 1328; see *France*.

**VALPARAISO**, principal port of Chili, South America, was bombarded by the Spanish admiral Mendez Nuñez, on 31 March, 1866, when much property was destroyed. It suffered by earthquakes in 1822, 1829, and 1851. Population, 1895, 122,447; 1910 (est.), 287,500. See *Chili*, 1891.

At the instigation of Spain, the catholics rose and massacred the protestants, 19-21 July, 1620. After much contention between the French and Austrians, the neutrality of the Valtelline was assured in 1639. It was annexed to the Cisalpine republic in 1797; to Italy, 1807; to Austria, 1814; to Italy, 1860.

**VALUATION OF PROPERTY ACT**, to provide for the uniform assessment of rateable property in the metropolis, was passed 9 Aug. 1869.

**VALVASOR** (or "VAVASOR"). Camden holds that the "Vavasor" was next below a baron. Du Cange maintains that there were two sorts of vavasors: the greater, who held of the king, such as barons and counts; and the lesser, called "valvasini," who held of the former, such as vassals holding land under a nobleman himself a vassal. Valvasors are mentioned in the Domesday book, 1086.

**VANADIUM** (from *Vanadis*, the Scandinavian *Venus*), metal discovered by Sefström, in 1830, combined with iron ore. A similar metal, discovered in lead ore by Del Rio in 1801, and named *Erythronium*, was proved by Wöhler to be Vanadium. Vanadium was discovered in the copper-bearing beds in Cheshire, in 1865, by Mr. (aft. Sir) H. E. Roscoe, by whom its peculiarities were further studied, and published in 1867-8. It is useful in photography and dyeing.

**VANCOUVER'S ISLAND**, North Pacific ocean, near the main land. Settlements were made here by the English in 1781, which were seized by the Spaniards in 1789, but restored. By a treaty between the British government and that of the United States in 1846, this island was secured to the former. It has become of much greater importance since the discovery of gold in the neighbouring main land in 1858, and the consequent establishment of the colony of British Columbia (*which see*). Victoria, the capital, was founded in 1857. The island was united with British Columbia by act passed in Aug. 1866; and on 24 May, 1868, Victoria was declared the capital. See *Juan, San*. The latter were defeated with great slaughter: the king was killed, and Huniades made prisoner, who had opposed the Christians breaking the truce for ten years, recently made at Szegedin. The emperor Nicholas of Russia arrived before Varna, the headquarters of his army, then besieging the place, 5 Aug. 1828. The Turkish garrison made a vigorous attack on the besiegers, 7 Aug.; and another on the 21st, but were repulsed. Varna surrendered, after a sanguinary conflict, to the Russian arms, 11 Oct. 1828. It was restored at the peace in 1829; its fortifications were dismantled, but have since been restored. The allied armies disembarked at Varna, 20 May, 1854, and sailed for the Crimea, 3 Sept. VENTILATORS were invented by the rev. Dr. Hales, and described to the Royal Society of London, May, 1741; and the ventilator for the use of ships was announced by Mr. Triewald, in November, same year. The marquis of Chabannes' plan for warming and ventilating theatres and houses for audiences was applied to those of London about 1819. The systems of Dr. Reid (about 1834) and others followed, with much controversy. Dr. Arnott's work on this subject was published in 1838. A commission on warming and ventilation issued a report in 1859.

Belt-driven and electric volume fans largely in use, 1910.

VENTRILOQUISM (speaking from the stomach), was known to the Greeks, who termed ventriloquists "belly-prophets." The name is a misnomer, as the sounds are produced by regulating the breathing and organs of voice, without motion of the lips. Among eminent ventriloquists were baron Mengen and M. Saint Gille, about 1772 (whose experiments were examined by a commission of the French Academy); Thomas King (about 1716); Charles Mathews (1824); and M. Alexandre (1822); others since.

VENUS, the Roman goddess of love and beauty (the Greek Aphrodite). *Statues*: Venus de Medicis, found near Tivoli and removed to France, 1680; the Venus found at Milo or Melos, 1820, placed in the Louvre, Paris, 1834. The transit of the planet over the sun was predicted by Kepler to take place

6 Dec. 1631, but was not observed; he died 15 Nov. 1630. The first transit observed, was by the rev. Jeremiah Horrox, or Horrocks, and his friend, Wm. Crabtree, on 24 Nov. 1639, as predicted by Horrox in 1633. The astronomer-royal Maskelyne observed her transit at St. Helena, 6 June, 1761. Capt. Cook made his first voyage in the *Endeavour*, to Otaheite, to observe a transit of Venus, 3 June, 1769; see *Cook's Voyages*. The diurnal rotation of Venus was discovered by Cassini in 1667. This is contested by Schiaperelli and others, who assert her rotation to be as long as her revolution in her orbit. See *Sun*, note.

Halley suggested the observation of the transit as a means of estimating the distance of the earth from the sun, and devised a method for this purpose

Another method was invented by Delisle about 1716

Both plans were used in Dec. 1743

Expeditions for the accurate observation of the phenomena, on 8 Dec. astronomical day; ordinary day, 9 Dec. 1874, were sent to different parts of the globe by all the great powers, and favourable results were reported 1875-6

The transit, on 6 Dec. 1882, was observed at Bath, Penzance, Cork, Cape Town, Washington, Melbourne, and many other places. The next transits will take place 8 June, 2004, and 6 June, 2012.

Venus was both a morning and evening star, rising 43 min. before the sun, and setting 43 min. after it 14 Feb. 1894

Dr. W. R. Brooks obtained some good photographs by the light of Venus when a morning star, Sept. 1900

**VERA CRUZ** (Mexico), built about 1600; was taken by the Americans in 1847, and by the allies on 17 Dec. 1861, during the intervention; retaken by the liberals, under Juarez, 27 June, 1867.

**VERCELLI**, the ancient Vercellæ, Piedmont, near which Marius defeated the Cimbri, 101 B.C. It was the seat of a republic in the 13th and 14th centuries. It was taken by the Spaniards, 1630; French, 1704; and allies, 1706; and afterwards partook of the fortunes of Piedmont.

**VERDEN** (Hanover). Here Charlemagne massacred about 4500 Saxons, who had rebelled and relapsed into idolatry, 782.

**VERDUN** (the ancient Verodunum), a first-class fortress on the Meuse, N.E. France, made a magazine for his legions by Julius Cæsar. It was acquired by the Franks in the 6th century, and formed part of the dominions of Lothaire by the treaty of Verdun, 843, when the empire was divided between the sons of Louis I. It was taken and annexed to the empire by Otho I. about 939. It surrendered to France in 1552; and was formally ceded in 1648. It was taken and held by the Prussians 43 days, Sept.—Oct. 1792. Gen. Beaurepaire, the commandant, committed suicide before the surrender, and 14 ladies were executed on 28 May, 1794, for going to the king of Prussia to solicit his clemency for the town. Verdun surrendered to the Germans 8 Nov. 1870, after a brave defence; two vigorous sallies being made 28 Oct. Above 4000 men were captured, with a large number of arms and ammunition. It was the last place held by the Germans; and was given up 15, 16 Sept. 1873.

**VERGARA, N. SPAIN.** Here the Carlist general, Maroto, made a treaty, termed "The pacification of Vergara," with Espartero, 31 Aug. 1839. The monument to celebrate it was destroyed by the Carlists in Aug. 1873.

**VERMANDOIS** (N. France), a county given by Charlemagne to his second son Pepin, whose family held it till the 11th century; in 1156 it came, by marriage, to the counts of Flanders; and in 1185 it was seized by Philip II., and incorporated with the monarchy in 1215.

**VERMONT**, a northern state in North America, was settled by the French, 1724-31; and ceded to Great Britain in 1763. It was freed from the authority of New York, and admitted as a state of the union in 1791. Population, 1880, 332,286; 1900, 343,641; 1910 (est.), 356,750; capital, Montpelier.

**VERNEUIL** (N.W. France), the site of a battle fought 17 Aug. 1424, between the Burgundians and English under the regent duke of Bedford, and the French, assisted by the Scots, commanded by the count de Narbonne, the earls of Douglas and Buchan, &c. The French at first were successful; but some Lombard auxiliaries, who had taken the English camp, commenced pillaging. Two thousand English archers came then fresh to the attack; and the French and Scots were totally defeated, and their leaders killed.

**VERNON GALLERY.** The inadequate manner in which modern British art was represented in the National Gallery was somewhat remedied in 1847 by the munificent present to the nation, by Mr. Robert Vernon, of a collection of 157 pictures, all but two being by first-rate British artists. They were first exhibited at Mr. Vernon's house in Pall-mall, next in the vaults beneath the National Gallery, afterwards at Marlborough house, and are now at the South Kensington Museum. In 1857, Mr. John Sheepshanks followed Mr. Vernon's example; see *Sheepshanks' Donations*.

**VERONA** (N. Italy) was founded by the Gauls or Etruscans; see *Campus Raudius*. The amphitheatre was built by Titus, A.D. 82. Verona has been the site of many conflicts. It was taken by Constantine 312; and on 27 Sept. 489 Theodoric defeated Odoacer, king of Italy. Verona was taken by Charlemagne 774. About 1260 Mastino della Scala was elected podestà, and his descendants (the Scaligeri) ruled, till subdued by the Visconti, dukes of Milan, 1387. Verona was conquered by the Venetians 1405, and held by them with some intermissions till its capture by the French general Massena, 3 June, 1796. Near to it Charles Albert of Sardinia defeated the Austrians 6 May, 1848. Verona is one of the four strong Austrian fortresses termed the Quadrangle, or Quadrilateral (*which see*), and here the emperor Francis Joseph, on 12 July, 1859, in an order of the day, announced to his army that he must yield to circumstances unfavourable to his policy, and thanked his people and army for their support. It was surrendered to the Italian government, 16 Oct. 1866; and the king was received by 70,000 persons in the amphitheatre, 18 Nov. 1866. Above 50,000 coins of Gallienus and other emperors, chiefly bronze, discovered near Verona, Jan. 1877. Population, 1881, 60,768; 1901, 74,261; 1910 (est.), 86,750.

**VERSAILLES** (near Paris) was a small village, in a forest thirty miles in circuit; where Louis XIII. built a hunting-seat about 1632. Louis XIV. between 1661 and 1687 enlarged it into a magnificent palace, which became the usual residence of the kings of France. By the treaty between Great Britain and the revolted colonies of British North America, signed at Paris, the latter power was admitted to be a sovereign and independent state, 3

Sept. 1783. On the same day a treaty was signed at Versailles between Great Britain, France, and Spain, by which Pondicherry and Carical, with other possessions in Bengal, were restored to France, and Trincomalee restored to the Dutch. Here was held the military festival of the royal guards, 1 Oct. 1789, which was followed (on the 5th and 6th) by the attack of the mob, who massacred the guards and brought the king back to Paris. Versailles became the residence of Louis-Philippe in 1830. The historical gallery was opened in 1837. Versailles, with the troops there, surrendered to the Germans 19 Sept. 1870, and the crown prince of Prussia entered the next day; and on 26 Sept. he awarded the iron cross to above 30 soldiers at the foot of the statue of Louis XIV. The palace was converted into a hospital. The royal head-quarters were removed here from Ferrières 5 Oct. After the peace, Versailles became the seat of the French government (see *France*), March, 1871. Removed to Paris 27 Nov. 1879. The congress for the revision of the constitution met here 4–13 Aug. 1884. See *France*, 1889.

**VERSE**, see *Poetry, Hexameter, Elegy, Iambic*, &c. Surrey's translation of part of *Virgil's Æneid* into blank verse is the first English composition of the kind, omitting tragedy, extant in the English language (published in 1547). The verse previously used in our grave compositions was the stanza of eight lines, the *ottava rima* (as adopted by the addition of one line by Spenser in his *Faëry Queene*), who probably borrowed it from Ariosto and Tasso. Boccaccio introduced it into Italy in his *Teseide*, having copied it from the old French *chansons*. Trissino is said to have been the first introducer of blank verse among the moderns, about 1508. *Vossius*.

**VERULAM**, see *Albans, St.*

**VERVINS** (N. France). Here was concluded the peace between Philip II. of Spain and Henry IV. of France, with mutual concessions, 2 May, 1598.

**VESERONCE** (S.E. France), near Vienne. Here Gondemar, king of the Burgundians, defeated and killed Clodomir, king of Orleans, and revenged the murder of his brother Sigismund and his family, 524. This conflict is called also the battle of Voiron.

**VESPER**, see *Sicilian Vespers*. In the house of the French ambassador at Blackfriars, in London, a Jesuit was preaching to upwards of three hundred persons in an upper room, the floor of which gave way with the weight, when the whole congregation was precipitated to the street, and the preacher and more than a hundred of his auditory, chiefly persons of rank, were killed. This catastrophe, termed the *Fatal Vespers*, occurred 26 Oct. 1623. *Stow*.

**VESTA**. The planet Vesta (the ninth) was discovered by Dr. Olbers, of Bremen, on 29 March, 1807. She appears like a star of the sixth magnitude.

**VESTALS**, virgin priestesses, took care of the perpetual fire consecrated to Vesta. The mother of Romulus was a vestal. Numa is said to have appointed four, 710 B.C., and Tarquin added two. Minutia was buried alive for breaking her virgin vow, 337 B.C.; Sextilia, 273 B.C.; and Cornelia Maximiliana, A.D. 92. It is said that only eighteen vestals had been condemned since the time of Numa. The order was abolished by Theodosius, 389.

**"VESTIGES OF THE NATURAL HISTORY OF CREATION,"** a work which upholds the doctrine of progressive development as a hypothetic history of organic creation, ascribed to Robert Chambers, and other persons, first appeared in 1844, and occasioned much controversy. See *Origin of Species*.

**VESUVIUS, MOUNT, S. Italy.** Near it, the Latin confederacy were totally defeated by the Romans, whose general, P. Decius Mus, had devoted himself to death, 340 B.C. By an eruption of Mount Vesuvius, the cities of Pompeii and Herculaneum (which see) were overwhelmed 24 Aug. 79 A.D., and more than 200,000 persons perished, among them Pliny the naturalist. Numerous other disastrous eruptions have occurred. Torre del Greco, with 4000 persons, was destroyed, 17 Dec. 1631. There was a dreadful eruption, which took place suddenly, 24 Nov. 1759, and another 8 Aug. 1767. The violent burst in 1767 was the 34th from the time of Titus. One in June, 1794, was most destructive: the lava flowed over 5000 acres of rich vineyards and cultivated land, and Torre del Greco was a second time burned; the top of the mountain fell in, and the crater was nearly two miles in circumference. A great eruption in Oct. 1822, and others in May, 1855, May and June, 1858, caused great destruction. A series of violent eruptions causing much damage occurred in Dec. 1861, and in Feb. 1865. Torre del Greco was again destroyed in Dec. 1861. Another eruption began 12 Nov. 1867, and continued increasing in grandeur and danger, March, 1868. A great eruption began 8 Oct. 1868, and continued, causing much destruction, 19, 20 Nov. A severe eruption began 23 April and ended about 3 May, 1882; above 60 lives were lost. The mountain was disturbed in 1876; and another eruption began about 20 Sept. 1878; lava was spouted to the height of 300 feet; an eruption began 11 June, 1879; an intermittent eruption 2 May, 1885. A new crater formed 7 June; continued flowing of lava, 11 June; ceases 16 June, renewed; a Brazilian tourist fell into the crater, July, 1891. **VETERINARY COLLEGES.** The Royal College of Veterinary Surgeons, London, which alone grants diplomas, was chartered in 1844.

The Veterinary Surgeons act, 44 & 45 Vict. sec. 62, passed 27 Aug. 1881, deals only with this college; amendment act passed, 30 July, 1900. The Royal Veterinary College at Camden Town, London, N.W., was founded in 1791. Centenary festival 19 Oct. 1891. This note was accepted by the czar, 10 Aug., but the sultan required modifications, which were rejected by Russia, 7 Sept. The sultan's note (31 Dec.) contained four points:—  
 1. The promptest possible evacuation of the principalities.  
 2. Revision of the treaties.  
 3. Maintenance of religious privileges to the communities of all confessions.  
 4. A definite settlement of the convention respecting the holy places. It was approved by the four powers, and the conferences closed on 16 Jan. 1854.—A new conference of plenipotentiaries, from Great Britain (lord John Russell), France (M. Drouyn de l'Huys), Austria (count Buol), Turkey (Arif Effendi), and Russia (count Gortschakoff), took place, March, 1854. Two points, the protectorate of the principalities and the free navigation of the Danube, were agreed to; but the proposals of the powers as to the reduction of the Russian power in the Black Sea were rejected by the czar, and the conference closed, 5 June, 1854. The English and French envoys assent to the Austrian propositions was not approved of by their governments, and they both resigned their official positions.

**VIENNE**, the ancient Vienna Allobrogum (S.E. France). Here the emperor Valentinian II. was put to death by Arbogastes, 15 May, 392, and a short reaction in favour of paganism followed. Vienne was capital of the kingdom of Burgundy in

432 and 879, and sometimes gave its name to the kingdom. A general council was held here in 1311. Vienne was annexed to the French monarchy, 1448.

**VIGILANCE MURDER ASSOCIATION**, see *Ireland*, 1883.

**VIGO** (N.W. Spain) was attacked and burned by the English, under Drake and Norris in 1589. Sir George Rooke, with the combined English and Dutch fleets, attacked the French fleet and the Spanish galleons in the port of Vigo, when several men-of-war and galleons were taken, and many destroyed, and abundance of plate and other valuable effects fell into the hands of the conquerors, 12 Oct. 1702. Vigo was taken by lord Cobham in 1719, but relinquished after raising contributions. It was again taken by the British, 27 March, 1809.

**VIKINGS**. Scandinavian chiefs, Swedes, Danes, and Norsemen, who in the 4th century migrated—eastward, to the countries beyond the Baltic; westward and southward, chiefly to the British isles.

M. Paul B. Du Chailu (died 30 April, 1903), in his "Viking Age," describes the Vikings as the ancestors of "the English-speaking nations," Oct. 1889

**VILLA FRANCA**. Near here, and Llerena, Spain, the British cavalry, under sir Stapleton Cotton, defeated the French cavalry under marshal Soult, 11 April, 1812.—**VILLA FRANCA**, a small port on the Mediterranean, near Genoa, was bought for a steam-packet station by a Russian company, about Aug. 1858, which caused some political excitement.—At **VILLA FRANCA**, in Lombardy, the emperors of France and Austria met, on 11 July, 1859 (after the battle of Solferino), and on 12 July signed the preliminaries of peace, the basis of the treaty of Zurich (*which see*).

**VILLA VICIOSA**. 1. in Portugal. Here the Portuguese, under the French general Schomberg, defeated the Spaniards, 1665. 2. in Castile, Spain. Here the struggle for the Spanish crown was decided in favour of Philip V. by Vendôme's victory over Staremberg and the Austrians, 10 Dec. 1710.

**VILLE DU HAVRE**, French Atlantic mail steamer, 5,100 tons, sailed from New York for Havre, 15 Nov. 1873: was run into by a Glasgow clipper, *Lochearn*, about 2 a.m., 22 Nov., and sank in twelve minutes; 226 out of 313 persons perished.

The crew of the *Lochearn* rescued 37, who were conveyed to Cardiff by the American vessel *Tremountain*, capt. Urquhart, arriving there 1 Dec. 1873  
 The *Lochearn*, beginning to sink, 28 Nov., was abandoned by her crew, who were rescued by the *British Queen*, and brought to Plymouth 7 Dec. "  
 On judicial examination, the *Lochearn* was exonerated in England, but censured in France Jan. 1874

**VILLETA** (Paraguay, South America). Here Lopez and the Paraguayans were totally defeated by the Brazilians and their allies, 11 Dec. 1868. Lopez and 200 men fled; 3,000 prisoners were made; and the war ended.

**VIMIERA** (in Portugal), where the British and Spanish forces, under sir Arthur Wellesley, defeated the French, under marshal Junot, duke of Abrantes, 21 Aug. 1808. The attack, made with great bravery, was gallantly repulsed; it was repeated by Kellermann at the head of the French

reserve, which was also repulsed. The French, charged with the bayonet, withdrew on all points in confusion, leaving many prisoners.

**VINCENNES**, a strong castle near Paris; a residence of the French kings from the 12th to the 14th centuries. Henry V. of England died at the Bois de Vincennes, 31 Aug. 1422. At the fosse of the castle, Louis duc d'Enghien was shot by order of Napoleon, after a hasty trial, early on the morning of 22 March, 1804.

**VINCENT, ST.** (West Indies), long a neutral island; but at the peace of 1763, the French agreed that the right to it should be vested in the English. The latter soon after engaged in a war against the Caribs, on the windward side of the island, who were obliged to consent to a peace, by which they ceded a large tract of land to the British crown. In 1779 the Caribs greatly contributed to the reduction of this island by the French, who, however, restored it in 1783. In 1795 the French landed some troops, and again instigated the Caribs to an insurrection, which was not subdued for several months. Mt. Soufrière (abt. 3,623 ft. high) erupted 24 April, 1718; and again, 1 May, 1812, a violent eruption took place, 3 craters opened, 1,295 dead bodies found, total deaths, 1,565, 100 hopelessly injured, 3,000 homeless, 16 sq. miles covered with lava, ash fell on Barbadoes, 90 miles off; 7 May, 1902, disturbances took place in the adjoining islands, and earthquake shocks were frequent at Kingstown and Georgetown, whilst the village of Wallibon partly sank, and that of Richmond rose, 17 May (*Nature*, 27 May, 1902); eruptions continued, violent, 18, 24 May; earthquake shocks and another eruption, 10 July (see *Martinique*, 8 May, 1902); slighter ones, 21 July *et seq.*; violent, 3, 5, 21 Sept., 16 Oct.; Messrs. Quinton, Powell, and Foster ascended the mountain, while in a state of activity, 28 Oct. 1902. Population in 1881, 40,548; in 1901, 47,548; 1909 (est.), 52,592; see *Windward Isles*.

Great destruction of life and property by a hurricane, 16 Aug. 1886; again, 300 deaths, 10-12 Sept. 1898. See *West Indies*.

Earthquake shocks felt, Feb. & Dec. 1906.

**VINCENT DE PAUL, ST., CHARITABLE SOCIETY** founded in 1833, in France, by twelve young men. It extends its extremely beneficial operations into Britain. Its power excited the jealousy of the French government, which suppressed its central committee of Paris, in Oct. 1861. St. Vincent de Paul was born, 1576; established the congregation of Lazarists, or Vincentines, 1625; Sisters of Charity, 1634; a founding hospital, 1648. He died 1660.

**VINCOY, N.** France. Here Charles Martel defeated the Neustrians, 21 May, 717, and acquired their country.

**VINE.** The vine was planted by Noah, 2347 B.C. *Gen.* ix. 20. A colony of vine-dressers from Phocæa, in Ionia, settled at Marseilles, and instructed the South Gauls in tillage, vine-dressing, and commerce, about 600 B.C. Some think that vines are aborigines of Languedoc, Provence, and Sicily, and that they grew spontaneously on the Mediterranean shores of Italy, France, and Spain. The vine was carried into Champagne, and part of Germany, by the emperor Probus, about A.D. 279. The vine and sugar-cane were planted in Madeira in 1420. In the gardens of Hampton-court palace is an old and celebrated vine, said to surpass any known vine in Europe; see *Grapes* and *Wine*. The Tokay vines were planted in 1350.

**Vine Disease.** In the spring of 1845, Mr. E. Tucker, of Margate, observed a fungus (since named *Oidium Tuckeri*) on grapes in the hot-houses of Mr. Slater, of Margate. It is a whitish mildew, and totally destroys the fruit.

The spores of this *oidium* were found in the vineries at Versailles in 1847. The disease soon reached the trellised vines, and in 1850 many lost all their produce.

In 1852, it spread over France, Italy, Spain, Syria, and in Zante and Cephalonia attacked the currants, reducing the crop to one-twelfth of the usual amount.

Through its ravages, the wine manufacture in Madeira ceased for several years.

Many attempts were made to arrest the progress of this disease, but without much effect. Sulphur dust is the most efficacious remedy.

The disease had much abated in France, Portugal, and Madeira, in 1863. In 1862 Californian vines were introduced into the two latter.

**VINEGAR.** The ancients had several kinds, which they used for drink. The Roman soldiers were accustomed to take it in their marches. The Bible represents Boaz, a rich citizen of Bethlehem, as providing vinegar for his reapers (1312 B.C.), a custom still prevalent in Spain and Italy.

**VINEGAR-HILL** (near Enniscorthy, in Wexford, S.E. Ireland). Here the Irish rebels, headed by father John, a priest, encamped and committed many outrages on the surrounding country. They were gradually surrounded by the British troops, commanded by Lake, 21 June, 1798, and after a fierce struggle, with much slaughter, totally dispersed.

**VIOL AND VIOLIN.** The lyre of the Greeks became our harp, and the viol of the middle ages became the violin. The violin is mentioned as early as 1200, in the legendary life of St. Christopher. It was introduced into England, some say, by Charles II. Straduarus (or Stradivarius) of Cremona, was a renowned violin-maker (1700 to 1722).

**VIRGINALS;** an early keyed instrument of the kind termed clavichords; used in the 16th and 17th centuries; played on; queen Elizabeth and Mary queen of Scots. According to Johnson, it owed its name to young women being the usual performers. Tallis, Morley, Purcell, Gibbons, and Bull composed for this instrument.

**VIRGINIA,** see *Rome*, 449 B.C.

**VIRGINIA,** the first British settlement in North America, was discovered by John Cabot in 1497, and was taken possession of for Raleigh, and named after the virgin-queen Elizabeth, 13 July, 1584. Vain attempts were made to settle it in 1585. Two expeditions were formed by patent in 1606, and others in 1610. In 1626 it reverted to the crown; and a more permanent colony was established soon afterwards. George Washington was delegate for Virginia in the congress of 1774. Eastern Virginia

seceded from the Union, 25 April, 1861, but Western Virginia declared for the Union, 13 Feb. and elected a governor, 20 Feb. 1861; became a state 1863. Virginia was a chief seat of the war. The state was readmitted to the congress, Jan.-Feb. 1870; see *United States and Richmond*. Population in 1880, 1,512,505; 1900, 1,854,184; 1910 (est.), 2,103,225; capital, Richmond. ### VIRGINIA CITY, see Nevada.

**VIRGIN ISLANDS** (West Indies), an eastern group discovered by Columbus (1494). Virgin Gorda, Tortola, Anegada, &c., and the Danish Isles, St. Thomas, Santa Cruz, and St. John. Population of the British possessions in 1891 was 4,639; 1901, 4,808; 1910 (est.), 5,275. Revenue, 1907-8, 3,971*l*.; expenditure, 4,367*l*.; imports, 7,009*l*.; exports, 6,027*l*. See *Leeward Isles*.

*Tortola* settled by Dutch buccanniers about 1648; expelled by the English (who have held it since). 1666 St. Thomas settled by Danes 1672, and St. John a few years after; held by the British 1801-2; 1807-15; proposed sale to the United States for 1,500,500*l*. to be made a "territory." Danish proclamation, 25 Oct. 1867; purchase declined by U.S. senate.

By a dreadful hurricane off St. Thomas, the Royal Mail steamers *Thorne* and *Wage* were entirely wrecked; the *Conway* and *Derwent*, and above 50 other vessels, driven ashore; about 1000 persons said to have perished.

Much suffering was occasioned in Tortola; houses blown down or unroofed, &c.

Earthquake at St. Thomas's and other isles, Nov. 1884. A negro insurrection, in which M. Fontaine, a planter, was killed; Frederickst and 35 out of 50 sugar plantations were burnt, and about 3000 whites rendered homeless. During the suppression by col. Garde, the governor, about 200 negroes were killed.

Earthquake shocks felt at San Juan and St. Thomas.

**VIRGIN MARY.** The Assumption of the Virgin is a festival in the Greek and Latin churches, in honour of the miraculous ascent of Mary into heaven, according to their belief, 15 Aug. A.D. 45. The Presentation of the Virgin is a feast celebrated 21 Nov., said to have been instituted among the Greeks in the 11th century; its institution in the West is ascribed to pope Gregory XI. 1372; see *Annunciation and Conception, Immaculate*.

**VISCONTI**, the name of a noble Italian family, which ruled in Milan from about 1277 to 1447; the heiress of the family was married to Francesco Sforza, who became duke 1450.

**VISCOUNT** (*Vice Comes*), anciently the name of the deputy of an earl. The first viscount in England created by patent was John, lord Beaumont, whom Henry VI. created viscount Beaumont, giving him precedence above all barons, 10 Feb. 1440. *Ashmole*. This title is of older date in Ireland and France. John Barry, lord Barry, was made viscount Buttevant, in Ireland, 9 Rich. II. 1385. *Beaton*.

**VISIBLE SPEECH**, a term applied by Mr. Alex. Melville Bell to his "Universal Self-Interpreting Physiological Alphabet," comprising thirty symbols representing the conformations of the mouth when uttering sounds. He stated that about

fifty different types would be required to print all known languages with these symbols. He expounded his system to the Society of Arts, London, 14 March, 1866; and published a book in 1867.

**VISIGOTHS**, separated from the Ostrogoths about 330; see *Goths*. The emperor Valens, about 369, admitted them into the Roman territories upon the condition of their serving when wanted in the Roman armies; and Theodosius the Great permitted them to form distinct corps commanded by their own officers. In 400, under Alaric, they invaded Italy, and in 410 took Rome. They founded their kingdom of Toulouse, 414; conquered the Alani, and extended their rule into Spain, 414; expelled the Romans in 468; and finally were themselves conquered by the Saracens under Muza, in 711, when their last king, Roderic, was defeated and slain; see *Spain* for a list of the Visigothic kings. Their rule in France ended with their defeat by Clovis at Vouglé, in 507.

**VITAL FORCE**, defined by Humboldt "as an unknown cause preventing the elements from obeying their primitive affinities." This theory is opposed by many physiologists, and animal motion is attributed to muscular and nervous irritability, illustrated by the researches of Galvani, Humboldt, sir Charles Bell, Marshall Hall, and others. The subject has been much discussed by the late professor Huxley and other eminent physiologists.

**VITTORIA** (N. Spain), the site of a victory obtained by Wellington over the French army commanded by Joseph Bonaparte, king of Spain, and marshal Jourdan, 21 June, 1813. The hostile armies were nearly equal, from 70,000 to 75,000 each. After a long and fearful battle, the French were driven, towards evening, through the town of Vittoria, and in their retreat were thrown into irretrievable confusion. The British loss was 22 officers and 479 men killed; 167 officers and 2640 men wounded. Marshal Jourdan lost 151 pieces of cannon, 451 waggons of ammunition, all his baggage, provisions, cattle, and treasure, with his bâton as a marshal of France. Continuing the pursuit on the 25th, Wellington took Jourdan's only remaining gun. Population, 1897, 30,514; 1910 (est.), 35,000.

**VIVISECTION**, physiological experiments upon living animals, as practised by William Harvey, John Hunter, and other eminent physiologists, it is said, with good results. The societies for the prevention of cruelty to animals in Dresden and Paris in 1859 requested the opinion of a committee of eminent scientific men on the merits of the knowledge thus acquired. Their judgment was not unanimous. The London society took up the question in 1860; and printed a pamphlet by Mr. G. Macilwain against vivisection. In Aug. 1862 an international conference to discuss the question was held at the Crystal Palace, Sydenham. The subject was discussed in 1866, and a prize awarded by the London society. Sir Charles Bell's opinion of vivisection was, that it either obscured the subject it was meant to illustrate, or misled men into practical errors of the most serious character.

Discussion revived in consequence of the prosecution of Dr. Schiff in Florence, who justified vivisection when any anæsthetic is used. 1873-6 Rival societies: 1. Society for the abolition of vivisection, 1875; Mr. G. R. Jesse, the founder (died June, 1898), leaves 10,000*l*. to the society; 2. International Association for total suppression of vivisection. 1876 Commission (viscount Cardwell, professor Huxley, and others) to inquire into the practice, appointed

23 June, 1875; report signed, 8 Jan.; published, March, 1876; a bill to regulate vivisection (cruelly to animals act) brought into parliament; strongly opposed by the medical profession in general, June, July; passed, 15 Aug. 1876. Vivisectioners are to have a licence or certificate.

The words aroused the resentment of numbers of medical students, and caused demonstrations which led to police court proceedings in Nov. 1907 and 1909. The memorial was removed by the decision of the Battersea borough council. . . . 10 March, 1910

**VIZIANAGRAM**, a town in Madras presidency, formerly a kingdom, among the last bulwarks against the Mahomedan invasion, and a refuge for Hindu learning. The sovereigns date from the 14th century. See *Vedas*.

**VIZIER, GRAND**, an officer of the Ottoman Porte, said to have been first appointed by Amurath I., about 1386. The office was abolished in 1838; but since been frequently revived and suppressed; see *Turkey*.

**VLADIMIR** (central Russia), a city founded in the 12th century, and the capital of a grand duchy from 1157 to about 1328.

**VOCALION**, a musical instrument in which tones are produced from strings made to vibrate by currents of air, the joint invention of Mr. James Baillie Hamilton and Mr. John Farmer assisted by Mr. Hermann Smith, described and illustrated by Mr. Hamilton at the Royal Institution, 21 May, 1875, and tried successfully at Harrow, 23 March, 1882, and soon after at Westminster Abbey; and at other places.

**VOICE FIGURES**, in a variety of beautiful forms, such as trees, flowers, ferns, stars, &c., are produced by directing the voice against an elastic membrane upon which powder, paste, or some similar substance has been placed. The Eidophone, an apparatus used for this purpose, was invented by Mrs. Watts-Hughes, and many interesting specimens of voice figures were exhibited by her at the Royal Society about 1885.

**VOIRON**, see *Veseronce*.

**VOLAPÜK** (from 'world' and 'speak'), universal commercial language invented by M. Schleyer, who taught it in Paris in Feb. 1886. The Philological Society of London advocated its use in diplomacy and science, in 1887. The roots chiefly borrowed from Rumanian, Germanic, and especially English languages shortened. There is a Volapük Academy at Munich.

**VOLCANOES**. In different parts of the earth there are above 200 volcanoes which have been active in modern times; see *Etna*, *Vesuvius*, *New Zealand*, *Owhyhee*, and *Iceland*. In Mexico, a plain was filled up into a mountain more than a thousand feet in height by the burning lava from a volcano, in 1759. A volcano in the isle of Ferro broke out 13 Sept. 1777, which threw out an immense quantity of red water, that discoloured the sea for several leagues. A new volcano appeared in one of the Azore islands, 1 May, 1808. Much volcanic activity in 1902 and 1905; see *Martinique*, *Vesuvius*, and *Vincent*, *St*.

**VOLHYNIA**, a Polish province, annexed to Russia 1793.

**VOLSCI**, an ancient Latin people, frequently at war with the Romans. From their capital, Corioli, Caius Martius (who defeated them about 490 B.C.) derived his name Coriolanus. The story of his banishment by his ungrateful countrymen; of his revenge on them by bringing the Volsci to the gates of Rome, yet afterwards sparing the city at the entreaties of his mother, Volumnia (487 B.C.), is considered by many as a poetical legend. The Volsci and their allies were totally defeated at Sutrium by the consul Valerius Corvus (346), and incorporated with the Roman people about 338.

**VOLSINII**, the inhabitants of an Etrurian city, who, after a sharp contest, were completely overcome by the Roman consul Titus Coruncanius 280 B.C.

**VOLTAIC PILE or BATTERY**, was constructed by Galvani; see *Galvanism* in article *Electricity*. The principle was discovered by Alessandro Volta, of Como (born 1745), for thirty years professor of natural philosophy at Pavia, and announced by him to the Royal Society of London in 1793. The battery was first set up in 1800. Volta was made an Italian count and senator by Napoleon Bonaparte, and was otherwise greatly honoured. While young he invented the electrophorus, electric pistol, and hydrogen lamp. He died in 1826, aged 81. The form of the Voltaic battery has been greatly improved by the researches of modern philosophers. The nitric acid battery of sir W. R. Grove was constructed in 1839; Alfred Smee's battery in 1840; the carbon battery of professor Robert Bunsen (died 16 Aug. 1899) in 1842. The first is very much used in this country; that of Bunsen on the continent; see *Copper-Zinc Couple* and *Italy*, (1899).

**VOLTURNO**, a river in S. Italy, near Capua, near to which Garibaldi and his followers held a strong position. This was furiously assailed by the royal troops on 1 Oct. 1860, who were finally repulsed after a desperate struggle, the fiercest in which Garibaldi had yet been engaged. He was aided greatly by a band of Piedmontese from Naples. On 2 Oct. general Bixio completed the victory by capturing 2500 fresh Neapolitan troops and dispersing others.

**VOLUNTARY CONTRIBUTIONS.** Public contributions for the support of the British government against the policy and designs of France amounted to two millions and a half sterling in 1798. About 200,000*l.* were transmitted to England from India in 1799. Sir Robert Peel, of Bury, among other contributions of equal amount, subscribed 10,000*l.* *Annual Register*; see *Patriotic Fund*. In 1862 nearly a million pounds were subscribed in the British empire for the relief of the Lancashire cotton spinners; see *Cotton and Mansion House*, where voluntary contributions for beneficent purposes are continually received.

### VOLUNTARY SCHOOLS, see Education.

**VOLUNTEERS** were enrolled in England for the American war, 1778, and especially in consequence of the threatened invasion of revolutionary France, 1793-4. Besides our large army, and 85,000 men voted for the sea, we subsidised 40,000 Germans, raised our militia to 100,000 men, and armed the citizens as volunteers; the yeomanry formed cavalry regiments. Between 1798 and 1804, when this force was of greatest amount, it numbered 410,000, of which 70,000 were Irish.\* On 26 Oct. 1803, king George III. reviewed in Hyde Park 12,401 London volunteers, and on 28 Oct. 14,676 more. The English volunteers were, according to official accounts, 341,600 on 1 Jan. 1804; see *Naval Volunteers*. In May, 1859, in consequence of the prevalence of the fear of a French invasion, the formation of volunteer corps of riflemen commenced under the auspices of the government, and by the end of the year many thousands were enrolled in all parts of the kingdom. The volunteers were said to be "a force potentially the strongest defence of England," 19 April, 1870. Dr. J. C. Bucknill, regarded as the originator of the movement, knighted, May, 1894. The new territorial scheme under which volunteers and yeomanry were reorganized came into force in 1907; see *Artillery Association*, *Naval Artillery Volunteer Force*, and *Territorial Force*.

YEOMANRY were enrolled by lord Chatham in 1761.

The number of yeomanry: 1826, 12,093; 1830, 11,598; 1835, 11,590; 1839, 13,677; 1844, 10,074; 1847, 10,184; 1854, 27,358; see *Territorials*.

By War-office regulations the whole yeomanry force was re-organized and appointed a definite place in the mobilization scheme (commencing 1 April),

4 Jan. 1893

**VOLUNTEERS.**—The first Middlesex volunteers were formed in 1803 as the duke of Cumberland's sharpshooters. They retained their organisation as a rifle club, when other volunteers were disbanded. In 1835 they were permitted by the duchess of Kent to take the name of the Royal Victoria Rifle Club.

Circular letter from col. Jonathan Peel, proposing organization of *National Volunteers Association* for promoting the practice of rifle-shooting, 12 May,

\* The first regiment of Irish volunteers was formed at Dublin, under command of the duke of Leinster, 12 Oct. 1779. They armed generally to the amount of 20,000 men, and received the unanimous thanks of the houses of lords and commons in Ireland, for their patriotism and spirit, for coming forward and defending their country. At the period when the force appeared Irish affairs bore a serious aspect; manufactures had decreased, and foreign trade had been hurt by a prohibition of the export of salted provisions and butter. No notice of the complaints of the people had been taken in the English parliament, when, owing to the alarm of an invasion, ministers allowed the nation to arm, and an immense force was soon raised. The Irish took this occasion to demand a free trade, and government saw there was no trifling with a country with arms in its hands. The Irish parliament unanimously addressed the king for a free trade, and it was granted, 1779.

1859. It was established in London, under the patronage of queen Victoria, Mr. Sidney (afterwards lord) Herbert, secretary at war, president, and the earl of Derby, earl Spencer, lord Elcho, and other noblemen vice-presidents. (Annual subscription one guinea, or a composition for life of ten guineas.)

Since 1902 there have been no manoeuvres of volunteers on an extensive scale, but there have been great musters of brigades last August at various stations. On Salisbury plain there have been combined operations by volunteers and regulars.

*Attendance at camp.*—In 1902 a new code of conditions concerning volunteer efficiency was issued, which included a clause of a most drastic character, requiring attendance *nolens volens* at a camp for 6 days. Practically the clause was not to come into effect until 1904. This clause was received with a great amount of consternation, and a crisis occurred, the strength of nearly every corps being rapidly depleted by the resignations of officers, non-commissioned officers and men. From time to time the War office made various concessions, until at last the obnoxious clause was practically withdrawn, but not until great mischief had been caused. Some corps are gradually recovering their former strength, but the establishment of a number was reduced. In the early part of 1903 a royal commission was appointed to inquire into the conditions of service and efficiency of the force, and the report of this commission was issued in June, 1904, but nothing has been carried out so far except the re-organisation of volunteer brigades.

VOSSEM, PEACE OF, between the elector of Brandenburg and Louis XIV. of France; the latter engaged not to assist the Dutch against the elector; signed 6 June, 1673.

VOTING PAPERS. See *Dodson's Act*. The proposal to use them was negatived in the debates on reform in 1867; adopted by the ballot act in 1873. A bill against plural voting was read first time in the commons, 30 April, 1895. See *Ballot*.

VOUGLÉ or VOULLÉ, S.W. France (near Poitiers), where Alaric II., king of the Visigoths, was defeated and slain by Clovis, king of France, 507, who subdued the whole country from the Loire to the Pyrenees. A peace followed between the Franks and Visigoths, who had been settled above one hundred years in that part of Gaul called Septimania. Clovis soon afterwards made Paris his capital.

VOYAGES. It is mythically stated that by order of Pharaoh-Necho, of Egypt, some Phœnician pilots sailed from Egypt down the Arabian Gulf, round what is now called the Cape of Good Hope, entered the Mediterranean by the Straits of Gibraltar, coasted along the north of Africa, and at length arrived in Egypt, after a navigation of about three years, 604 B.C. *Herodotus*. The first voyage round the world was made by a ship, part of a Spanish squadron which had been under the command of Magellan (who was killed at the Philippine Islands in a skirmish) in 1519-20; see *Circumnavigators*, *North-West Passage*, and *Periplus*.

VOYSEY ESTABLISHMENT FUND. The Rev. Charles Voysey having been deprived for heresy (see *Church of England*, 1871), began a series of services at St. George's hall, Langham-place, 1 Oct. 1871. The fund for their maintenance was supported by Bp. Hinds of Norwich (retired), Sir John Bowring, and other eminent liberals. Services now (1910) held in Swallow-street, Piccadilly, the congregation worshipping as the "Theistic Church."

VULCAN, see *Planets*. The Greek god Hephaistos answered to the Roman Vulcan.

VULCANITE (vulcanised india-rubber), also termed *Ebonite*.

VULGATE (from *vulgatus*, published), a term applied to the Latin version of the Scriptures which is authorised by the council of Trent (1546), and which is attributed to St. Jerome, about 384. The older version, called the Italic, is said to have been made in the beginning of the 2nd century. A critical edition was printed by order of pope Sixtus V. in 1590, which, being considered inaccurate, was superseded by the edition of pope Clement VIII. in 1592. The earliest printed vulgate is without date, by Gutenberg and Fust, probably about 1455, the first dated (Fust and Schœffer) is 1462.

**WACHT DES DEUTSCHEN VATERLAND** ("Watch of the German Fatherland"). German national hymn, by Reichardt, first performed 2 Aug. 1825. Very popular during the war 1870-71.

**WADHAM COLLEGE** (Oxford). Founded by Nicholas Wadham, and Dorothy, his wife, in 1613. In this college, in the chambers of Dr. Wilkins (over the gateway), the founders of the Royal Society frequently met prior to 1658.

**WAGER OF BATTLE**, see *Appeal*.

**WAGES IN ENGLAND.** The wages of sundry workmen were first fixed by act of parliament 25 Edw. III. 1350. Haymakers had but one penny a day. Master carpenters, masons, tilers, and other coverers of houses, had not more than 3*d.* per day (about 9*d.* of our money); and their servants 1½*d.*

By the 23 Henry VI. the wages of a bailiff of husbandry was 23*s.* 4*d.* per annum, and clothing of the price of 5*s.* with meat and drink; chief hind, carter, or shepherd, 20*s.*, clothing, 4*s.*; common servant of husbandry, 15*s.*, clothing, 40*d.*; woman-servant, 10*s.*, clothing, 4*s.* . . . . . 1444

By the 11 Henry VII., a like rate of wages with a little advance: as, for instance, a free mason, master carpenter, rough mason, bricklayer, master tiler, plumber, glazier, carver or joiner, was allowed from Easter to Michaelmas to take 6*d.* a day without meat and drink; or, with meat and drink, 4*d.*; from Michaelmas to Easter, to abate 1*d.*. A master having under him six men was allowed 1*d.* a day extra . . . . . 1495

Agricultural labourers per week: Warwickshire, 3*s.* 6*d.* and 4*s.*; Devonshire, 5*s.*; Suffolk, 5*s.* and 6*s.*; wool-weavers, about 3*s.* and 4*s.* (Macaulay) about 1685

In 1866 the annual amount of wages paid in the United Kingdom was estimated by Mr. Gladstone at 250,000,000*l.*; by Mr. Bass at 350,000,000*l.*; and by professor Leone Levi at 418,300,000*l.*, earned by 10,697,000 workers, ages 20 to 60.

In 1872-8 many trades struck for increase of wages, and frequently were successful; in 1877-9, unsuccessful.

In 1878 professor Levi estimated that 503,000,000*l.* were earned (by men, 390,000,000*l.*; by women, 113,000,000*l.*); after deducting for holidays, &c., 422,700,000*l.*

He says, that "In no other country are wages more liberal, but in no other country are they more wastefully used." See *Strikes*.

**WAGGONS** were rare in the 18th century. They, with carts, &c., not excepting those used in agriculture, were taxed in 1783. The carriers' waggons are now nearly superseded by the railways.

**WAGRAM**, a village near Vienna, where Napoleon I. totally defeated the archduke Charles, 5, 6 July, 1809. The slaughter on both sides was dreadful; 12,000 Austrians were taken by the French, and the defeated army retired to Moravia. An armistice was signed on the 12th; and on 24 Oct., by a treaty of peace, Austria ceded all her sea-coast to France; the kingdoms of Saxony and Bavaria were enlarged at her expense; part of Poland in Galicia was ceded to Russia; and Joseph Bonaparte was recognised as king of Spain.

**WAHABEES** OR **WAHABITES**, a warlike Mahometan reforming sect, considering themselves the only true followers of the prophet, established, themselves in Arabia about 1750, under the rule of Abd-el-Wahab, who died 1787. His grandson, Saoud, in 1801, defeated an expedition headed by the caliph of Bagdad. In 1803 this sect seized Mecca and Medina, and continued their conquests, although their chief was assassinated in the midst of his victories. His son, Abdallah, long resisted Mahommed Ali, pacha of Egypt, but in 1818 was defeated and taken prisoner by Ibrahim Pacha, who sent him to Constantinople, where he was put to death. The sect is well described by Mr. W. Gifford Palgrave in his "Journey and Residence in Arabia in 1862-3," published in 1865.

Over 15,500 children have been rescued since foundation of society in 1881. 106 homes (including 2 in Canada, and 5 special homes for crippled children) and some 4,100 children now under society's care. **WAITS**, the night minstrels who perform shortly before Christmas. The name was given to the musicians attached to the king's court. We find that a company of waits was established at Exeter in 1400 to "pipe the watch." The waits in London and Westminster were long officially recognised by the corporation.

**WAKEFIELD** (W. Yorkshire), an ancient town. Near it a battle was fought between the adherents of Margaret, the queen of Henry VI., and the duke of York, in which the latter was slain, and 3000 Yorkists fell upon the field, 31 Dec. 1460. The earl of Warwick supported the cause of the duke's son, the earl of March, afterwards Edward IV., and the civil war was continued. An art and industrial exhibition was opened at Wakefield, 30 Aug. 1865. The Bishopricks act, authorising the establishment of a see at Wakefield, was passed 16 Aug. 1878. The required funds subscribed Jan. 1888. Population, 1881, 30,354; 1901, 41,413; 1909 (est.), 43,923.

**WAKES**, the ancient parish festivals on the saint's day to commemorate the dedication of the church; regulated in 1536, but gradually became obsolete.

**WALBROOK CHURCH** (London), a masterpiece of Sir Christopher Wren, completed in 1679. There was a church here in 1135, and a new church was erected in 1429.

**WALCHEREN** (an island at the mouth of the Scheldt, Holland). The unfortunate expedition of the British to this isle in 1809 consisted of 35 ships of the line, and 200 smaller vessels, principally transports, and 40,000 land forces, the latter under the command of the earl of Chatham, and the fleet under sir Richard Strachan. For a long time the destination of the expedition remained secret; but before 28 July, 1809, when it set sail, the French journals had announced that Walcheren was the point of attack. Flushing was invested in August; a dreadful bombardment followed, and the place was taken 15 Aug.; but no suggestion on the part of the naval commander, nor urging likewise by officers, could induce the earl to vigorous action, until the period of probable success was gone, and necessity obliged him to return with as many of the troops as disease and an unhealthy climate had spared. The place was evacuated, 23 Dec. 1809. The house of commons instituted an inquiry, and lord Chatham resigned his post of master-general of the ordnance, to prevent greater disgrace; but the policy of ministers in planning the expedition was, nevertheless, approved. The following epigram, of which various readings exist, appeared at the time:—

"Lord Chatham [or the warrior earl] with [his] sabre drawn,  
Stood waiting for sir Richard Strachan;  
Sir Richard, longing (or eager) to be at 'em,  
Stood waiting for the earl of Chatham."  
A lychgate erected by queen Victoria at Dovercourt parish church, in memory of British soldiers who died there of disease contracted during the expedition 1809-11, was opened by gen. Gatacre, 22 Sept. 1899.

**WALDECK AND PYRMONT**, united German principalities, established in 1682. The late reigning family claim descent from the Saxon hero, Witikind, who flourished about 772. Prince George Victor, born 14 Jan. 1831, succeeded his father, George, 15 May, 1845; died May, 1893; succeeded 12 May, 1893, by Frederic, son, born 20 Jan. 1865; married princess Bathildis of Schaumburg-Lippe,

9 Aug. 1895; heir-apparent, prince Josias, born 13 May, 1896. On 22 Oct. 1867, the states approved a treaty of annexation, and the administration was transferred to Prussia, 1 Jan. 1868. Population, 1905, 59,127. Estimated revenue and expenditure, 1910, 56,956*l.*; debt, 1909, 79,710*l.*

**WALDENSES** (also called Valdenses, Vallenses, and Vaudois), a sect inhabiting the Cottian Alps, derives its name, according to some authors, from Peter de Waldo, of Lyons (1170). They had a translation of the Bible. The Waldenses settled in the valleys of Piedmont about 1375, but were frequently dreadfully persecuted, especially in the 17th century, when Charles I. of England interceded for them (1627-9) and Oliver Cromwell by threats (1655-6) obtained them some degree of toleration. All the Waldensian Barbes or pastors, save two, died in the great plague of 1630. Gilles and Gros went to Geneva and Lausanne for Swiss Calvinist ministers to fill the vacancies. The new ministers were no sooner inducted than they deposed the surviving Barbes and abolished all the distinctive teaching and usages of the community, substituting the Genevese model. They were permitted to have a church at Turin, Dec. 1853. They became French subjects when Savoy was annexed by Napoleon III. in 1860. In March, 1868, it was stated that there were in Italy 28 ordained Waldensian ministers, and 30 other teachers.

**WALES**, Cambria, Cymru, the land of the Cymry, called by the Romans *Britannia Secunda*. Welsh and Wales are corruptions of Teutonic epithets applied to foreigners, especially Gauls. After the Roman emperor Honorius gave up Britain, Vortigern was elected king of South Britain. He invited over the Saxons to defend his country against the Picts and Scots; but the Saxons perfidiously sent for reinforcements, consisting of Saxons, Danes, and Angles, by which they made themselves masters of South Britain. Many of the Britons retired to Wales, and defended themselves against the Saxons, in their inaccessible mountains, about 447. In this state Wales remained unconquered till Henry II. subdued South Wales in 1157; and in 1282 Edward I. entirely reduced the whole country, and ended being put to its independence by the death of Llewelyn, the last prince.\* In 1284 the queen gave birth to a son at Caernarvon, whom Edward styled prince of Wales, now title of the heir to the crown of Great Britain. Wales was united and incorporated with England by act of parliament, 1536; see *Britain, Bards and Population*: 1891, 1,518,914; 1901, 1,455,930; 1910 (est.), 1,700,000. The ancient laws were to be preserved in civil causes; but the law of inheritance was to be changed, and the English criminal law to be put in force. *Annals of England*,

## ENGLISH PRINCES OF WALES

- 1284 Edward Plantagenet (afterwards king Edward II.), son of Edward I., born in Caernarvon Castle on the 25th April, 1284. It is asserted that immediately after his birth he was presented by his father to the Welsh chieftains as their future sovereign, the king holding up the royal infant in his arms, and saying, in the Welsh language, "*Eich Dyn*," literally in English, "This is your man," but signifying, "This is your countryman and king." See, however, "*Ieh Ddyn*."  
 1302 Edward of Carnarvon made prince of Wales and earl of Chester.  
 1343 Edward the Black Prince.  
 1376 Richard, his son (afterwards Richard II.).  
 1399 Henry (afterwards Henry V.), son of Edward IV.  
 1454 Edward, son of Henry VI.; slain at Tewkesbury, 4 May, 1471.  
 1471 Edward (aft. Edward V.), son of Edward IV.  
 1483 Edward, son of Richard III.; died in 1484.  
 1489 Arthur, son of Henry VII.; died in 1502.  
 1502 Henry, his brother (afterwards Henry VIII.).  
 Edward, his son (afterwards Edward VI.) was duke of Cornwall, and not prince of Wales.  
 1540 Henry Frederic, son of James I.; died 6 Nov. 1612.  
 1546 Charles, his brother (afterwards Charles I.).  
 Charles, his son (afterwards Charles II.), never created prince of Wales.  
 1714 George Augustus (afterwards George II.).

• WALES, PRINCESS OF. This title was held, some authors say, during the early period of her life, by the princess Mary of England, eldest daughter of Henry VIII., and afterwards queen Mary I. She was created, they state, by her father princess of Wales, in order to conciliate the Welsh people and keep alive the name, and was the only princess of Wales in her own right; a rank she enjoyed until the birth of a son to Henry, who was afterwards Edward VI., born in 1537. This is denied by Banks.

**WAR, GAME OF** (German, *Kriegspiel*), based on the game of chess, was described in a pamphlet in 1780, and rules for it laid down by Domänenrathe von Reisswitz about 1820, and published by his son in 1824-8. Capt. (earl Cromer, 1901) Evelyn Baring published a translation of works on the subject in 1872. A society (including von Moltke) was formed at Magdeburg to study it. The imposture was discovered by Henry VII. 1493. Some writers consider that Warbeck was not an impostor.

Warbeck attempted to land in Kent, with 600 men, 169 were taken prisoners, and executed, July, 1495.

Recommended by the king of France to James IV. of Scotland, who gave him his kinswoman, lord Huntley's daughter, in marriage, when he assumed the title of Richard IV. James IV. invaded England in his favour, 1496.

Ward, from observing a small fern and grass growing in a closed glass bottle, in which he had placed a chrysalis covered with moist earth, was led to construct his well-known *closely glazed* cases, which afford to plants light, heat, and moisture, and exclude deleterious gases, smoke, &c. They are particularly adapted for ferns. In 1833 they were first employed for the transmission of plants to Sydney, &c., with great success, and professor Faraday lectured on the subject in 1838.

**WATER-COLOUR PAINTING** was gradually raised from the hard dry style of the 18th century to its present brilliancy, by the efforts of Nicholson, Copley Fielding, Sandby, Varley, the great Turner, Pyne, Cattermole, Prout, Thos. Collier and H. G. Hine. The Water-colour Society's exhibition, which began in 1805, was made Royal in 1881. The Institute of Painters in Water-colours, established 1831 (made Royal in 1883), opened new galleries in Piccadilly in 1883, and threw open their exhibitions to all artists.

**WATERFORD** (S. Ireland), built about 879, was totally destroyed by fire in 811. Rebuilt and considerably enlarged by Strongbow in 1171, and still further in the reign of Henry VII., who granted considerable privileges to the citizens. Richard II. landed and was crowned here in 1399; in 1600, James II. embarked from hence for France, after the battle of the Boyne; and William III. resided here twice, and confirmed its privileges. Memorable storm here, 18 April, 1792. The cathedral of Water-

ford, dedicated to the blessed Trinity, was first built by the Ostmen, and by Malchus, the first bishop of Waterford, after his return from England from his consecration, 1096. This see was united with that of Lismore in 1363. It was valued in the king's books, by an extent returned 29 Henry VIII., at 72*l.* 8*s.* 1*d.* Irish per annum. By stat. 3 & 4 Will. IV., c. 37 (the Irish Church Temporalities act), the see of Waterford and Lismore was united with the see of Cashel and Emly, 14 Aug. 1833. The interior of the cathedral, organ, &c., were destroyed by fire, 25 Oct. 1815. Population, 1891, 21,093; 1901, 26,743; 1910 (est.), 30,000.

**WATER-GLASS**, a name given to a liquid mixture of sand (silic) and one of the alkalis (potash or soda). Glauber (*De Lithiase*) mentions a similar mixture in 1644. Dr. Von Fuchs gave an account of his process in 1825; and Mr. Frederick Ransome, of Ipswich, ignorant of Von Fuchs's discovery, patented a mode of preparing water-glass in 1845, which he afterwards greatly improved upon. In 1857, M. Kuhlmann, of Lille, published a pamphlet setting forth the advantageous employment of water-glass in hardening porous stone and in stereochromy (*which see*). It has been applied to the exterior of many buildings in France and England. The memoirs of Von Fuchs and Kuhlmann translated and printed in England, 1859, by direction of the prince consort.

**WATERLOO**, in Belgium, the site of the great battle, on Sunday, 18 June, 1815, between the French army, of 71,947 men and 246 guns, under Napoleon, and the allies, commanded by the duke of Wellington; the latter, with 67,661 men and 156 guns, resisted the various attacks of the enemy from about ten in the morning until five in the afternoon. About that time, 16,000 Prussians reached the field of battle; and by seven, the force under Blücher amounted to above 50,000 men, with 104 guns. Wellington then moved forward his whole army. A total rout ensued, and the carnage was immense. Of the British (23,991), 93 officers and 1916 men were killed and missing, and 363 officers and 4560 men wounded—total, 6932; and the total loss of the allied army amounted to 4206 killed, 14,539 wounded, and 4231 missing, making 22,976 *hors de combat*. French loss about 30,000. Napoleon, quitting the wreck of his army, returned to Paris; and, finding it impossible to raise another, abdicated. *P. Nicolas.*

Napoleon attributed his defeat to the failures of marshal Grouchy, Wellington said unjustly.

By the side of the chapel of Waterloo, which was uninjured by shot or shell on 18 June, 1815, Marlborough cut off a large division of the French forces, 17 Aug. 1705. The commanders on the same field are the only British commanders whose career brought them to dikedoms.

**WATERLOO BRIDGE, LONDON.** A bridge over this part of the Thames was repeatedly suggested during the last century, but no actual preparations to carry it into effect were made till 1806, when Mr. G. Dodd procured an act of parliament, and gave the present site, plan, and dimensions of

the bridge; but, in consequence of some disagreement with the committee, he was superseded by Mr. John Kennie, who completed this noble structure. It was commenced 11 Oct. 1811, and opened 18 June, 1817, on the anniversary of the battle of Waterloo, when the prince regent, the duke of Wellington, and other distinguished personages, were present. Its length within the abutments is 1242 feet; its width within the balustrades is 42 feet; and the span of each arch, of which there are nine, is 120 feet. Bought for 475,000*l.* by metropolitan board of works; opened toll free, 5 Oct. 1878.

On Oct. 9, 1857, two youths, named Risby, found on one of the abutments of the bridge a carpet bag, containing human bones and flesh, which had been cut up, salted, and boiled, and some foreign clothes. No clue could be found respecting these remains, which were interred in Woking cemetery.

**WATERLOW PARK**, S. Hampstead or Highgate, was presented to the metropolis with 5,000*l.* to the London county council, by sir Sydney H. Waterlow, 12 Nov. 1889. The park was opened to the public by sir John Lubbock (lord Avebury, 1900), chairman of the council, 17 Oct. 1891. A statue of sir Sydney Waterlow unveiled by princess Louise, duchess of Argyll, 28 July, 1900.

**WATER-MILLS**, used for grinding corn, are said to have been invented by Belisarius, the general of Justinian, while besieged in Rome by the Goths, 555. The ancients parched their corn, and pounded it in mortars. Afterwards mills were invented, which were turned by men and beasts with great labour; yet Pliny mentions wheels turned by water. *See Telo-dynamic transmitter.*

**WATERSPOUT.** Two waterspouts fell on the Glatz mountains in Germany, and caused dreadful devastation to Hautenbach and many other villages; many persons perished, 13 July, 1827. A waterspout at Glanlesk, near Killarney, in Ireland, passed over a farm of Mr. John Macarthy, destroying farm-houses and other buildings; seventeen persons perished, 4 Aug. 1831. The estimated length of one seen near Calcutta, 27 Sept. 1855, was 1000 feet. It lasted ten minutes, and was absorbed upwards. One seen on 24 Sept. 1856, burst into heavy rain. The town of Miskolcz, Hungary, destroyed by a waterspout; great loss of life and property, 30 Aug. 1878. 61 persons said to have been killed by a waterspout in Algeria, Oct. 1881. A waterspout at Arequipa, Peru, caused immense damage, several persons drowned, 14 Feb.; one at Pachuca, Mexico, 30 deaths, 27 Sept. 1884; another near Lagos, very destructive, 6 or 7 June, 1885. Destructive waterspout at Swansea 4 Sept. 1886; another on Batcombe hills, Dorsetshire, greatly damaged the villages of Chatoole, Cerne, and Mintern, 7 June, 1889. By the bursting of a waterspout at Voiron, near Grenoble, France, much damage was done with loss of life, 5 June, 1897; Steelville, Missouri, nearly destroyed by one, 13 deaths, 8 July, 1898. At Safi, Morocco, about 100 deaths, great damage, 29 Dec. 1901. Large waterspout and three smaller ones seen off Calais, 21 Aug. 1903. *See Wurtemberg*, June, 1895.

**WATKIN TOWER**, Wembley Park, near Harrow, N.W. of London. In 1889, the Metropolitan tower company was formed, sir Edward W. Watkin, chairman, for the erection of a tower resembling the Eiffel tower, *see Paris*, 1889.

Premiums were offered for designs, and 50 guineas were awarded to Messrs. A. D. Stewart, J. M. MacLaren, and W. Dunn, joint authors. The designs were ex-

hibited at Drapers' Hall, 26 April of 1890. Part of the Wembley Park estate was leased by a new company for 999 years, from 23 Oct. 1892, at a rental of 2000*l.* a year. The structure, solely of steel, to be erected by Messrs. Heenan and Ison of Manchester (ibid. 1892), under the direction of sir Benjamin Baker.

Wembley Park opened, 11 May, 1904.

Erection of the tower stopped through lack of funds.

Aug. 1894: the first platform opened, 155 feet from the ground, 11 May, 1897; demolition commenced, 11 Sept. 1904; completed 8 Sept. 1907.

**WATTIGNIES** (N. France). Here Jourdan and the French republicans defeated the Austrians under the prince of Coburg, and raised the siege of Maubeuge, 14-16 Oct. 1793.

**WAVE PRINCIPLE** (in accordance with which the curves of the hull of a ship should be adapted to the curves of a wave of the sea) formed the subject of experiments begun by Mr. John Scott Russell in 1832, with the view of increasing the speed of ships. Colonel Beaufoy is said to have spent 30,000*l.* in researches upon this matter. It was also taken up by the British Association, who published reports of the investigations. *See Undulatory Theory and Yacht.*

**WAVERLEY NOVELS.** The publication of the series began with "Waverley; or, 'Tis Sixty Years since," in 1814, and closed with "Tales of my Landlord," fourth series, in 1831. The authorship was acknowledged by sir Walter Scott, at a dinner, 23 Feb. 1827. The original MSS. of several of Scott's poems and novels were sold by auction by Christie and Manson for 1255 guineas, 6 July, 1867.

**WAWZ** or **WAWER** (Poland). The Poles under Skrzynecki attacked the Russians at Wawz, and after two days' hard fighting, all the Russian positions were carried by storm, and they retreated with the loss of 12,000 men and 2000 prisoners, 31 March, 1831. The loss of the Poles was small, but their triumph was soon followed by defeat and ruin.

**WAX** came into use for candles in the 12th century; and wax candles were esteemed a luxury in 1300, being but little used. In China, candles of vegetable wax have been in use for centuries; *see Candleberry*. The wax tree, *Ligustrum lucidum*, was brought from China before 1794.—**SEALING-WAX** was not brought into use in England until about 1550. Its use was greatly superseded by the introduction of adhesive envelopes, about 1844.

**WAXWORK.**—Exhibition of models in wax were popular in the 15th and 16th centuries. The collection of wax figures exhibited by Mrs. Salmon at Aldgate, early in the last century, were removed to Fleet-street and shown there till 1812, when they were sold, it is said, for 5*l.* Madame Tussaud, a skilled modeller, exhibited her remarkable collection of models and casts of eminent persons with costumes and other interesting relics in the boulevard du Temple, Paris, 1785. In 1802 she exhibited her collection at the Lyceum, Strand, London, and afterwards at other places. The interest of the exhibition has been energetically sustained for many years at Baker-street, London, W., and latterly at Marylebone-road, by Madame Tussaud and her family; she died 15 April, 1850, aged 90. Early in 1889 the collection was purchased by a company, Mr. John Tussaud being engaged as manager.

Mr. Louis Tussaud opened a new exhibition of wax-works at 207, Regent-street, 24 Dec. 1890; destroyed by fire, 20 June, 1891, loss, 10,000*l.*

*See Trials*, Jan. 1894.

**WE.** Sovereigns generally use *we* for *I*, which style began with king John, 1199. *Coke*. The German emperors and French kings used the plural about 1200.

**WEALD** of Kent and Sussex, the site of very large, ancient forests; St. Leonard's still remaining; near which, in the Wealden formation, Dr. G. A. Mantell discovered the remains of huge extinct animals, 1825 et seq.

**WEAVING** appears to have been practised in China more than a thousand years before it was known in Europe or Asia. The Egyptians ascribed the art to Isis; the Greeks to Minerva; and the Peruvians to the wife of Manco Capac. Our Saviour's vest, or coat, had not any seam, being woven from the top throughout, in one whole piece. The print of a frame for weaving such a vest may be seen in *Cabnet's Dictionary*, under the word *Vestments*. Two weavers from Brabant settled at York, where they manufactured woollens, which, says king Edward, "may prove of great benefit to us and our subjects" (1331). Flemish dyers, cloth drapers, linen-makers, silk-throwsters, &c., settled at Canterbury, Norwich, Colchester, Southampton, and other places, on account of the duke of Alva's persecution, 1567; see *Loom* and *Electric Loom*.

**WEDDING-RINGS** were used by the ancients, and put upon the wedding finger, from a supposed connection with a vein there with the heart. According to Pliny they were made of iron; in the time of Tertullian of gold. Wedding-rings are to be of standard gold, by statute, 1855; see *Adriatic*.

**WEDDINGS**. Silver weddings are celebrated after a union of 25 years; golden weddings after a union of 50 years; and diamond weddings after a union of 60 years, some apply it to 75 years. John, king of Saxony, celebrated his golden wedding, 10 Nov. 1872.

**WEDGWOOD WARE**, pottery and porcelain produced by Mr. Josiah Wedgwood, of Staffordshire, in 1762. His potteries, termed Etruria, were founded in 1771. Previously to 1763, much earthenware was imported from France and Holland.

**WEDNESDAY**, the fourth day of the week, so called from the Saxon idol Woden or Odin, worshipped on this day. Woden was the reputed author of magic and the inventor of all the arts, and was thought to answer to the Mercury of the Greeks and Romans.

**WEEDON INQUIRY** (Northamptonshire). Commissioners were appointed to inquire into the accounts of Mr. Elliot, superintendent of the great military clothing establishment at this place, in July, 1858, and commenced sitting in September. Many of the statements were afterwards disputed, and caused much dissatisfaction.

**WEEK**, the space of seven days, supposed to be first used among the Jews, who observed the sabbath every seventh day. They had three sorts of weeks—the common one of seven days; the second of years, seven years; the third of seven times seven years, at the end of which was the jubilee. All the present English names are derived from the Saxon:—

**WEIGHTS AND MEASURES**. These and the stamping of gold and silver money, are attributed to Pheidon, tyrant of Argos, 895 B.C.; see *Arun-delian Marbles*. Weights were originally taken from grains of wheat, the lowest being still called a grain. *Chalmers*. See *Crith*.

The Jews ascribed weights and measures to Cain; the Egyptians to Theuth, or Thoth; the Greeks, to Hermes (the Roman Mercury).

The basis of ancient measures was the natural proportions of the human body: the digit, or breadth of the middle part of the first joint of the fore finger, being the lowest unit of the scale.

The Egyptian cubit (six palms), under the Pharaohs, was about 18 $\frac{1}{4}$  English inches; the cubit of Ptolemy about 21 $\frac{1}{2}$  inches; he determined the length of a stadium, and of a degree.

The sacred cubit of the Jews (Newton), 24 $\frac{1}{2}$  inches. The standard measure was originally kept at Winchester by the law of king Edgar.

Standards of weights and measures were provided for the whole kingdom of England by the sheriffs of London, 9 Rich. I.

A public weighing-machine was set up in London, and all commodities ordered to be weighed by the city-officer, called the weigh-master, who was to do justice between buyer and seller, stat. 3 Edw. II. (*Stone*).

Report of the Standards commission states that errors exist in official standards, dated 24 July, 1868.

A new Weights and Measures act passed to secure uniformity in all markets in the United Kingdom, and abolish local measures, 8 Aug. 1878; this act was combined with another passed 26 July, 1880, another act passed 26 June, 1877.

Weights and Measures (metric system) act passed, 1897.

**WELLS** were dug by Abraham, 1892 B.C., and Isaac, 1804 (*Gen.* xxi. 30, and xxvi. 19). Danaus is said to have introduced well-digging into Greece from Egypt. Norton's "tube-well," patented Oct. 1867, is said to be the invention of Hiram J. Messenger, Stephen Brewer, and Byron Mudge, of New York. The apparatus consists of an iron tube perforated with holes at the lower end, and shod with a steel point, which readily enters the hardest soil when forcibly driven. It was used with great advantage during the civil war 1861-4; by the British in their campaign in Abyssinia in 1867-8; and by the Russians in Khiva, 1873.

**WELLS** (Somerset). The cathedral church was built by Ina, king of the West Saxons, 704, and by him dedicated to St. Andrew. Other West Saxon kings endowed it, and it was erected into a bishopric in 909, during the reign of Edward the Elder. The present church was begun by Robert, 18th bishop of this see, and consecrated in 1148, and completed by his successors and finally consecrated by Jocelin. The first bishop was Ethelm or Adelmus (afterwards bishop of Canterbury). The see was united with Bath (*which see*) in 1088. Population, 1881, 4,634; 1901, 4,849; 1910 (est.), 5,000.

**WESLEYAN METHODISTS, THE**, founded by John Wesley (born 1703, died 1791) and his brother Charles, who in 1727 with a few other students formed themselves into a small society for the purpose of mutual edification by religious exercises. From their regularity of life they were called *Methodists*, in 1729. John Wesley went to Georgia in America, in 1735, with a view of converting the Indians. On his return to England, in 1738, a great change took place in his mind (24 May), he commenced itinerant preaching, and gathered many followers. On finding many churches shut against him, he built spacious meeting-houses in London, Bristol, and other places. The Wesleyan Methodist Society, as such, began in 1739. For some time the Wesleys were united with George Whitefield; but differences respecting the doctrine of election led to a separation in 1741; see *Whitefield*. Wesley was almost continually engaged in travelling through the United Kingdom. His two leading doctrines were conscious assurance of

acceptance with God and Entire Sanctification. His society was well organised, and he preserved his influence over it to the last. "His genius for government was not inferior to that of Richelieu." *Macaulay*. The deed of declaration, establishing his annual conference (which first met in 1744 on a legal basis) is dated 28 Feb. 1784. The Conference of 1791 accorded every privilege conferred by the Deed of Declaration on all preachers in full connexion with it. In 1851 there were 428 circuits in Great Britain, with between 13,000 and 14,000 local or lay preachers, and about 920 itinerant preachers, and 6,579 chapels; in 1910, 8,643 chapels with 2,455 ministers, between 19,000 and 20,000 lay preachers and 516,596 members; 7,942 Sunday schools with 134,743 teachers and officers, and 1,013,922 scholars.

Other branches of Methodists are:—

New Connexion formed by Rev. A. Kilham	1797
Primitive Methodists formed by H. Bourne and W. Clowes in Staffordshire	1810
Bible Christians, or Bryanites, founded by Wm. O'Bryan, a Wesleyan lay preacher in Cornwall	1815

The last arose out of the publication of the notorious "Fly Sheets." The suspected authors and their friends were expelled. By these disruptions the main body is thought to have lost 100,000 members.—This sect in America numbered about a million in 1844, when a division took place on the slavery question.

## WESTERN AUSTRALIA, formerly SWAN

RIVER SETTLEMENT, which was projected by colonel Peel in 1828. Regulations issued from the colonial office, and captain (aft. sir James) Stirling, appointed lieut.-gov., Jan. 17, 1829; who arrived

at the site in August following. The three towns of Perth, Fremantle, and Guildford were founded same year. In March, 1830, fifty ships, with 2000 emigrants, with property amounting to 1,000,000*l.*, had arrived before hardly any dwellings had been erected or land surveyed. The more energetic settlers left for home, or the neighbouring colonies, and the colony languished for twenty years for want of suitable inhabitants—the first settlers, from their previous habits and rank in life, proving unfit for the rough work of colonisation. In 1848, the colonists requested that convicts might be sent out to them, and in 1849 a band arrived, who were kindly received and well treated. The best results ensued. By 1853, 2000 had arrived, and the inhabitants of Perth had requested that 1000 should be sent out annually. The reception of convicts ceased in after-years, in consequence of the energetic opposition of the other Australian colonies (1865).—The settlement of King George's Sound was founded in 1826 by the government of New South Wales. It was used as a military station for four years. In 1830, the home government ordered the settlement to be transferred to Swan River. Since the establishment of steam communication, the little town of Albany, employed as a coaling station, has become a thriving seaport. It possesses an excellent harbour. **WESTMINSTER BISHOPRICS AND DEANERY.** At the dissolution of monasteries, Westminster abbey was valued at 397*l.* per annum; king Henry VIII. in 1539 erected it into a deanery; and in 1540 into a bishopric, and appointed Thomas Thirlby prelate. He was translated to Norwich in 1550, and with him ended the bishopric of Westminster; Middlesex, his diocese, being restored to London. The dean presided until the accession of Mary, who restored the abbot. Elizabeth displaced the abbot, and erected the abbey into a collegiate church of a dean and twelve prebendaries, as it still continues. On the revival of the order of the Bath, in 1725, the dean of Westminster was appointed dean of that order, which honour has been continued.—Dr. Nicholas Wiseman was created *archbishop of Westminster* by the pope Pius IX. 30 Sept. 1850; see *Papal Aggression*. Dr. Wiseman died 8 Feb. 1865; Henry Manning was consecrated his successor 8 June, following; he died 14 Jan. 1892, and was succeeded by Dr. Herbert Vaughan about 30 March; enthroned 8 May; invested with the *pallium*, the first since 1556, 16 Aug. 1892; died 19 June, 1903, succeeded by Dr. Bourne, Aug. 24, enthroned 24 Dec. 1903. See *Roman Catholics*.

**WESTMINSTER BRIDGES.** The handsome old bridge was begun (after a design of M. Labelye), 13 Sept. 1738, the first stone laid 29 Jan. 1738-9; opened for passengers 18 Nov. 1750; cost 426,650*l.* It was built of Portland stone, and crossed the river where the breadth is 123 feet.

Owing to the sinking of several of its piers, most of the balustrades on both sides were removed, to relieve the structure of its weight.

By 16 & 17 Vict. c. 46 the estates of its commissioners were transferred to her majesty's commissioners of works, who were empowered to remove the then existing bridge, and build a new bridge (near the old one) . . . 4 Aug. 1853

The contract required the completion of the works by . . . 1 June, 1857

The works were suspended for a time, in consequence of the failure of Messrs. Mare, the contractors. The government eventually undertook the building, which they entrusted to Mr. Thomas Page, the engineer. One half of the new bridge was opened for use early in 1860; the whole on . . . 24 May, 1862

**WESTMINSTER CONFESSION OF FAITH AND CATECHISMS** were drawn up by the "Assembly of Divines" (partly consisting of laymen), who sat by authority of parliament in Henry VII.'s chapel, Westminster, from 1643 to 1647. These have ever since been the doctrinal standards of Scotch Presbyterians.

**WESTMINSTER HALL** (London), first built by William Rufus in 1097, for a banqueting-hall; and here in 1099, on his return from Normandy, "he kept his feast of Whitsuntide very royally." The hall became ruinous before the reign of Richard II., who repaired it in 1397, raised the walls, altered the windows, and added a new roof, as well as a stately porch and other buildings. In 1236 Henry III. on New-year's day caused 6000 poor persons to be entertained in this hall, and in the other rooms of his palace, as a celebration of queen Eleanor's coronation; and here Richard II. held his Christmas festival in 1397, when the number of the guests each day the feast lasted was 10,000. *Stow*. The courts of law were established here by king John. *Idem*. Westminster hall was stated to be the largest room in Europe unsupported by pillars (except a hall of justice at Padua); it is 270 feet in length, 74 feet broad. The hall underwent a general repair in 1802. Concurrently with the erection of the palace of Westminster, many improvements and alterations have been made in this magnificent hall. The courts of law removed to the new buildings in the Strand Jan. 1883. Restorations proposed by Mr. J. L. Pearson, R.A., July, 1884. The roof and windows greatly damaged by an explosion of dynamite about 2 p.m. 24 Jan. 1885.

**WESTMINSTER HOSPITAL**, founded, 1719; chartered, 1836.

**WESTMINSTER SCHOOL** or **ST. PETER'S COLLEGE**, was founded by queen Elizabeth in 1560, for the education of forty boys, denominated the Queen's scholars, who are prepared for the university. It is situated within the abbey enclosure. Besides the scholars on the foundation, many of the nobility and gentry send their sons to Westminster for instruction. The annual performance by the scholars of a Latin play is in conformity with the statute of queen Elizabeth. A proposal in 1860 to remove the school was disapproved of in 1861.

*Westminster Schools, United*, comprise Emanuel and St. Margaret's hospitals, and rev. James Palmer's and Emery Hill's school charities, which were abolished by the endowed school commissioners 27 June, 1873. Neville, earl of Westmoreland, revolted against Elizabeth in 1569, and was attainted in 1570. Woodland and meadows acquired by the National Trust declared open by the princess Louise, 15 Oct. 1902.

**WESTPHALIA** (Germany). This duchy belonged in former times to the dukes of Saxony, and afterwards became subject to the archbishop of Cologne. On the secularisation in 1802, it was made over to Hesse Darmstadt; and in 1814 was ceded for an equivalent to Prussia. The kingdom of Westphalia, one of the temporary kingdoms of

Bonaparte, composed of conquests from Prussia, Hesse-Cassel, Hanover, and the smaller states to the west of the Elbe, was created by decree 18 Aug. 1806, and Jerome Bonaparte appointed king, 1 Dec. 1807. Hanover was annexed to it, 1 March, 1810. The kingdom was abolished in 1813, and the countries were restored to their former rulers.

Through strike of the coal miners for increased pay and shorter hours of labour, Herr Krupp, of Essen, had to stop his iron and steel works at several places for want of coal about 4 May. A conflict took place at Gladbeck between the troops and miners, and three miners were killed, 7 May; the owners stand firm; about 39,000 men on strike, 8 May; nearly 100,000 strikers out, 13 May; the government intervenes to effect a compromise, about 13 May; the emperor receives three delegates from miners, 14 May, and advises both parties to come to a compromise, about 15, 16 May; strike spreading to Silesia &c., 15 May; strikers in Westphalia about 110,000, in Silesia 10,000, 16 May—20 May; 40 members of the striking committee arrested 26 May; strike ends by a compromise, 31 May, 1850. **WESTPHALIA or MÜNSTER, PEACE OF;** the treaties signed at Osnaburg 6 Aug., and at Münster 24 Oct. 1648, between France, the emperor, and Sweden; Spain continuing the war against France. By this peace (ending the thirty years' war) the principle of a balance of power in Europe was first recognised; Alsace given to France, and part of Pomerania and some other districts to Sweden; the Lower Palatinate restored to the elector palatine; the religious and political rights of the German states established; and the independence of the Swiss Confederation recognised by Germany.

**WEST SAXONS,** see *Wessex*, in *Britain*.

**WEYMOUTH,** Dorsetshire, was given by Henry I. to St. Swithin's, Winchester. Taken from Charles I., by the parliamentarians, 1644; visited and brought into note by George III., 1789. **WHALE-FISHERY,** it is said, was first carried on by the Norwegians in the ninth century. *Lenglet.* Whales were killed at Newfoundland and Iceland, for their oil only, 1578; the use of their fins and bones was not yet known, consequently (a writer adds) no stays were worn by the ladies. The English whale-fishing commenced at Spitzbergen in 1598; but the Dutch had been previously fishing there. The fishery was much promoted by an act of parliament passed in 1749. From 1800 to 2000 whales have been killed annually on the coast of Greenland, &c. The quantity of whale-oil imported in 1814 was 33,567 tuns; in 1826, when gas-light became general, 25,000 tuns; in 1840, about 22,000 tuns; in 1850, 21,360 tuns; in 1861, 19,176 tuns; in 1871, 24,679 tuns; in 1878, 20,656 tuns; in 1883, 17,156 tuns; in 1890, 20,307 tuns; in 1895, 24,597 tuns; in 1900, 21,323 tuns; in 1905, 25,508

**WHARNCLIFFE MEETINGS** of public companies (held to give enlarged powers under certain prescribed conditions) are so called because the standing orders of the house of lords, under which they are held, were introduced by lord Wharncliffe, about 1846.

**WHEAT.** The Chinese ascribe to their emperor, Ching-Noung, who succeeded Fohi, the art of husbandry, and method of making bread from wheat, about 2000 years before the Christian era. Wheat was introduced into Britain in the 6th century, by Coll ap Coll Frewi. *Roberts.* The first wheat imported into England of which we have a note was in 1347. Various statutes have regulated the sales of wheat, and restrained its importation, in order to encourage its being raised at home. In 1862 attention was drawn to the probable utility of considering the pedigree of wheat. In 1871 it was estimated that 3,571,894 acres in the United Kingdom were devoted to wheat; in 1876, 3,124,342; 1,417,483 acres in Great Britain in 1895; 1,845,042 in 1900; 1,796,995 in 1905; 1,626,733 in 1908. See *Bread* and *Corn Laws*. Greatest producers (in order), United States, Russia, France, Great Britain, &c. The wheat crop for Great Britain is said to have yielded 71,939,647 bushels in 1888; 37,176,257 in 1895; 52,039,809 in 1900, 58,902,499 in 1905; 52,535,139 in 1908. See *Corner*, 1898, 1909, and *Agriculture*, 1843.

**WHEEL, BREAKING ON THE.** A barbarous mode of death, of great antiquity, ordered by Francis I. for robbers, about 1535; see *Racine*.

"The Great Wheel," started, carrying several hundreds of people at the Empire of India exhibition, Earl's Court, 6 July, 1895. Through a stoppage of the machinery, between 60 and 70 persons were detained 16 hrs. in the upper cars, 21-22 May, 1896; demolished, 19 April, 1907.

**WHIGS.** In the reign of Charles II. the name *Whig* was a term of reproach given by the court party to their antagonists for holding the principles of the "whigs," or fanatical covenants in Scotland; and in return the name *Tory* was given to the court party, comparing them to the Tories, or popish robbers in Ireland. *Baker*. The distinction arose out of the discovery of the Meal-tub plot (*which see*) in 1678. Upon bringing up the meal plot before parliament, two parties were formed: the ones who doubted the plot styled those who believed in it *Whigs*; these styled their adversaries *Tories*. In time these names, given as marks of opprobrium, became honoured distinctions. *Hume*. The Whigs brought about the revolution of 1688-9, and established the protestant succession. They were chiefly instrumental in obtaining the abolition of the slave trade and slavery, the repeal of the Test and Corporation act, Catholic emancipation, parliamentary and municipal reform, the repeal of the corn laws, and similar measures. The Whig Club was established by Charles James Fox; one of its original members was the great Francis, duke of Bedford, who died in 1802. See *Liberals*. For the principal Whig ministries, see *Hatfield*, *Walpole*, *Rockingham*, *Grey*, *Melbourne*, *Russell*, *Palmerston*, and *Gladstone*.

**WHIP**, the popular title of the patronage secretary of the treasury, whose duty it is to collect members to make a house on important occasions, &c. It is the duty of both conservative and liberal whips to promote the interest of their party in every conceivable way.

**WHISKY**, the spirit distilled from malt and other corn in Scotland and Ireland. The distillation of whisky is referred to the 16th century; but some authors state it to have been earlier; see *Distillation*. In 1855 the duties on spirits distilled in Scotland and Ireland were equalised with those distilled in England. *Women's Whisky War*, see *United States*, 1874.

Select committee on British and foreign spirits appointed by house of commons issue report 1890  
See *Trials* 26 Feb. 1890  
Royal commission on whisky under the presidency of lord James of Hereford, appointed in Feb. 1908  
Issue its report 9 Aug. 1909  
In the distilling season 1905-7 there were 150 distilleries working in Scotland, 27 in Ireland, and 8 in England. 36,000,000 proof gallons of spirits were produced in Scotland and Ireland, and 13,000,000 proof gallons in England.

**WHIST**, a game at cards, became general at the end of the 17th century.

Lord Peterborough introduced short whist early in the past century; the laws were revised in 1864

**WHITBY**, N.R. Yorkshire. The monastery here, under St. Hilda, founded by king Oswy, 657, destroyed by the Danes 876, was restored by William de Percy about 1100. The Chalmleys established alum works here in 1615. Whitby was made a borough in 1832, and absorbed into the county in 1885. Population, 1881, 14,086; 1901, 11,748.

**WHITEBAIT DINNER**, when the cabinet ministers met at the end of each session, is said to have begun at the end of the 18th century, through sir Robert Preston and Mr. George Rose inviting Mr. Pitt and his colleagues to dine at Dagenham, and afterwards at Greenwich. Another account dates its origin in 1721. The annual whitebait dinner, stopped by the Gladstone ministry, was revived by the Disraeli ministry, 1 Aug. 1874, and continued by the Gladstone, 1 Sept. 1880. No dinner since 1883; was revived by the Rosebery ministry, 15 Aug. 1894. The whitebait (*clupea alba*) is a subject of controversy. Albert Günther, of the British Museum, in his Catalogue of Fishes, says the whitebait is "a purely nominal species," and that all the examples which he has examined were young herrings (1868).

At the inquiry in June, 1878, James Henry Cannon, fisherman, claimed the discovery of the fish for his grandfather, Richard, who named it 1750. It was mentioned in a letter in the life of lord Malmesbury, 2 July, 1763.

**WHITEBOYS**, a body of ruffians in Ireland, so called on account of their wearing linen frocks over their coats. They committed dreadful outrages in 1761, but were suppressed by a military force, and their ringleaders executed in 1762. They rose and were again suppressed in 1786-7. The insurrection act was passed on their account in 1822.

**WHITE CAPS**, a self-constituted organisation in the United States, which professes to take cognizance of offences against morality and social order, punishing the offenders by severe whippings. Called "White caps" from the members wearing white hoods to conceal their faces when visiting the houses of alleged delinquents.

**WHITECHAPEL**, a parish in East London, was part of Stepney till 1329. The church, built in 1073, was replaced by one consecrated 2 Feb. 1877, which was burnt 26 Aug. 1880. Population, 1801, 74,402; 1910 (est.), 79,500.

While conveying the mutilated remains to be concealed in his cellars in Southwark, Wainwright and Alice Day were apprehended, through the courage and activity of Alfred Philip Stokes, 11 Sept. Day was discharged; Henry and his brother Thomas were committed for trial 12 Oct. 1875.

Much excitement was caused by the murder and brutal mutilation of unfortunate women at different times—Smith, 3 April; Martha Turner, 7 Aug.; Nichols, 31 Aug.; Chapman, 7, 8 Sept. Coroners return open verdict. The evidence showed the murderer possessed surgical knowledge, his object being to get possession of certain organs. Two more women murdered in a similar manner near Commercial Road and Aldgate; E. Watts or Stride and C. Conway or Edlowes between 1 and 2 A.M. 30 Sept. The lord mayor offers 500*l.* reward in relation to the murder near Aldgate; Mary Jane Kelly's body found dreadfully mutilated in 26 Dorset Street, Spitalfields, 9 Nov. 1888.

**WHITE DOVES**, a South Russian religious sect, said to be wealthy and superstitious, strongly advocating celibacy: under a chief named Koudrine. Members were tried for moral offences about April, 1876.

**WHITEFIELDITES**. George Whitefield, the founder of the "*Calvinistic Methodists*," born 1714, was the son of an innkeeper at Gloucester, where he received his first education. He was admitted a servitor at Oxford in 1732, became a companion of the Wesleys there, and aided them in establishing Methodism. He parted from them in 1741, on account of their rejection of the doctrine of election. He was the most eloquent preacher of his day. His first sermon was preached in 1737, and he commenced field preaching in 1739. He is said to have delivered 18,000 sermons during his career of 34 years. He visited America in 1737, 1739, and

1744. His followers are termed "the countess of Huntingdon's connexion," from his having become her chaplain in 1748, and from her energetic support of the sect, by establishing a college at Trevecca, 1707. See *Spafields*. There were 109 chapels of this connexion in 1851; 36 chapels in 1899, but many of his followers have joined the Independents. He died 30 Sept. 1770, and the countess died 17 June, 1791; see *Tabernacle*.

**WHITE FRIARS**, see *Carmelites* and *Sanctuaries*.

**WHITEHALL** (London), built by Hubert de Burgh, earl of Kent, before the middle of the 13th century. It afterwards devolved, by bequest, to the Black Friars of Holborn, who sold it to the archbishop of York, whence it received the name of York-place, and continued to be the town residence of the archbishops till taken by Henry VIII. from cardinal Wolsey, in 1530. At this period it became the residence of the court. Queen Elizabeth, who died at Richmond in 1603, was brought from thence to Whitehall, by water, in a grand procession. It was on this occasion, Camden informs us, that the following quaint panegyric on her majesty was written:

"The queen was brought by water to Whitehall,  
 At every stroke the oars did tears let fall.  
 More clung about the barge: fish under water  
 Wept out their eyes of pearl, and swam blind after.  
 I think the barge-men might, with easier thighs,  
 Have rowed her thither in her people's eyes;  
 For howsoever thus much my thoughts have scanned,  
 She had come by water, had she come by land."

Whitehall was partly burnt 9-10 April, 1691; totally destroyed by fire, 4 Jan. 1697-8, except the banqueting-house, which had been added to the palace of Whitehall by James I., according to a design of Inigo Jones, in 1619. In the front of Whitehall Charles I. was beheaded 30 Jan. 1649. George I. converted the hall into a chapel 1723-4. The exterior of this edifice underwent repair between 1829 and 1833. The chapel was ordered to be permanently closed, 28 Oct. 1890; lent during queen Victoria's reign, to the Royal United Service Institution, from 1 Jan. 1891; first meeting held, 7 March, 1891.

**WHITE HATS**, a party in the Low Countries formed about 1377, against Louis, count of Flanders. The struggle lasted till 1384, when it was settled by Philip, duke of Burgundy.

**WHITE HOODS**, see *Catechumens*.

**WHITE HORSE**, see *Ashdown*.

**WHITE HOUSE** (Washington), built of free-stone, the residence of the president, gives name to the United States government, as St. James's palace does to that of Great Britain.

**WHITE LEAD**, see *Lead*.

**WHITE LEAGUE**, formed in Louisiana and other southern states of North America, to resist the aggressions of the emancipated negroes and their friends, termed "carpet-baggers." See *New Orleans*, 1874.

**WHITE PLAINS** (N. America), where a battle was fought 28 Oct. 1776, between the revolted Americans and the British forces under sir William Howe. It terminated in the defeat of the Americans, who suffered considerable loss in killed, wounded, and prisoners.

**WHITE SHEEP**, a name given to the Turcomans who conquered Persia about 1468, and persecuted the Shiites, but were expelled by Ismail, who founded the Sophi dynasty in 1501.

**WHITE TOWER**, the keep or citadel in the Tower of London, a large, square, irregular building, erected in 1070 by abbot Gundulph, afterwards bishop of Rochester. It measures 116 feet by 96, and is 92 feet in height: the walls, which are 11 feet thick, having a winding staircase continued along two of the sides, like that in Dover Castle. It contains an extensive armoury. Within this tower is the ancient chapel of St. John, originally used by the English monarchs. The turret at the N.E. angle, the highest of the four by which the White Tower is surmounted, was used for astronomical purposes by Flamsteed previously to the erection of the royal observatory at Greenwich.

**WHITSUNTIDE**, a festival appointed to commemorate the descent of the Holy Ghost upon the apostles: the newly-baptized persons, or catechumens, are said to have worn white garments on Whitsunday. This feast is movable, being always exactly seven weeks after Easter. Rogation week (*which see*) is the week before Whitsunday.

Whitsunday, a Scotch quarter-day, is always on 15 May, as settled by an act of 1693; but local usage varies.

**WHITTINGTON'S CHARITIES**. Sir Richard Whittington, a citizen and mercer of London, served the office of lord mayor three times, the last in 1419. Many false stories are connected with his name, and his munificent charities are little known. He founded his college, dedicated to the Holy Ghost and the Virgin Mary, in 1424; and his almshouses in 1429; the latter, originally built in London, now stand on Highgate-hill (built 1808) near the supposed site of the stone which commemorated the legend of his return to London, after leaving it in despair.

**WHITWORTH FOUNDATIONS**. Mr. (aftd. sir) Joseph Whitworth, the eminent engineer (born 21 Dec. 1803; died 22 Jan. 1887), in a letter to the first lord of the treasury, dated 18 March, 1868, offered to found 30 scholarships of the annual value of 100*l.* each, to be applied for the further instruction of young men, natives of the United Kingdom, selected by open competition for their intelligence and proficiency in the theory and practice of mechanics and its cognate sciences, with a view to the promotion of engineering and mechanical industry in this country; and he expressed hopes that means might be found for bringing science and industry into closer relation with each other than at present obtains here. This offer was accepted by the lords of the committee of the privy council, 28 March, 1868. In 1875, sir Joseph assigned an estate to support these scholarships. For the results of sir Joseph Whitworth's will, see *Manchester*, 1888-90.

**"WHOLE DUTY OF MAN;"** (the authorship doubtfully attributed to abps. Sancroft, Frewen, and Sterne; to bishops Fell and Chapel; to Dorothy, lady Packington, and others;) first published, 1659. *Lowndes*. It is attributed by some to John Ischam.

**WICKLIFFITES**, the followers of John Wickliffe (born 1324), a professor of divinity in the university of Oxford and rector of Lutterworth in Leicestershire. He was a forerunner of the reformation of the English Church from popery, being among the first who opposed the authority of the pope, transubstantiation, the celibacy of the clergy, &c. Wickliffe, protected by John of Gaunt, Edward's son and Richard's uncle, was virulently

persecuted by the church, and only saved from martyrdom by a paralytic attack, which caused his death, 31 Dec. 1384, in his 60th year. The Council of Constance, in 1414, decreed his bones to be disinterred and burnt, which was done by the bishop of Lincoln, and his dust was cast into the river Swift, 1415. Wickliffe's English version of the Bible was commenced in 1380; a noble edition of it was printed at Oxford in 1850. *Wycliff Society*, founded in 1882 to publish his works. Quincentenary of his death celebrated in London, &c., 21 May, 1884. See *Lollards*. A band of protestants organised by the late Mr. Kensit under the name of Wickliffites has been active in carrying on an anti-ritualistic propaganda.

**WIDOWS**. The Jewish law required a man's brother to marry his widow if without children (1490 A.C.). For the burning of widows in India, see *Suttee*. Among the numerous associations in London for the relief of widows are, one for the widows of musicians, instituted in 1738; another (now existing) established 1881; for widows of medical men, 1788; widows' friend society instituted in 1808; society for the relief of distressed widows, instituted in 1823; society for the relief of widows and children of clergymen, instituted in 1823; soldiers' and sailors' families association, founded 1885; and a society for artists' widows, 1814.—WIDOWERS were taxed in England as follows: a duke, 12*l.* 10*s.*; lower peers, smaller sums; a common person, 1*s.*; 7 Will. III. 1695.

**WIG**, see *Peruke*.

**WIGAN** (Lancashire). The king's troops, commanded by the earl of Derby, were defeated and driven out of the town in 1643 by the parliamentary forces under sir John Smeaton. The earl was again defeated by colonel Ashton, who razed the fortifications of Wigan to the ground, same year; and once more by a greatly superior force commanded by colonel Lilburne, 1651. In this last engagement, sir Thomas Tildesley, an ardent royalist, was slain; a pillar was erected to his memory in 1679. The colliers in the neighbourhood struck, and acting riotously 17, 18 April, 1868, were quelled by the military. Arrangements were soon after made with the employers. The prince and princess of Wales at their visit, 4 June, 1873, opened a new hospital. &c. See *Railway Accidents*, 2 Aug. 1873. Population, 1881, 48,104; 1891, 55,093; 1904, 62,800; 1910 (est.), 72,950.

**WIGHT, ISLE OF**, the Roman *Vecta* or *Victis*, was conquered by Vespasian in the reign of Claudius. It was conquered by the Saxons under Cerdic about 530; by the Danes, 787, and in 1001, when they held it for several years. It was invaded by the French, July, 1377, and has several times suffered from invasion by them. In 1442, Henry VI. alienated the Isle to Henry de Beauchamp, first premier earl of England and then duke of Warwick, and afterwards crowned him king of the Isle of Wight, with his own hands; but dying without heirs male, his regal title died with him, and the lordship of the Isle returned to the crown. Charles I., after his flight from Hampton-court, was a prisoner in Carisbrook castle, in 1647. In the time of Charles II. timber was very plentiful. In this Isle was queen Victoria's marine residence, Osborne-house, which she bequeathed to king Edward VII.; he gave it to the nation to be used as a convalescent home for officers in the navy and army, 9 Aug. 1902. Population, 1901, 82,387; 1910 (est.), 95,525.

**WILLS AND TESTAMENTS** are of very high antiquity, see *Genesis* xlviii. The private will of Sennacherib, king of Assyria, 680 B.C., found at Nineveh, is translated in *Records of the Past*, Vol. I. Solon introduced them at Athens, 578 B.C. There are regulations respecting wills in the Koran. Trebatius Testa the civilian, introduced codicils to wills at Rome, 31 B.C. The power of bequeathing lands by the last will and testament of the owner was confirmed to English subjects 1 Henry I. 1100; but with great restrictions and limitations respecting the feudal system, which were taken off by the statute of 32 Hen. VIII. 1541. *Blackstone's Commentaries*. The first will of a sovereign on record is stated (but in error) to be that of Richard II. 1399; Edward the Confessor made a will, 1066. Various laws have regulated the wills and testaments of British subjects. All previous statutes were repealed by the "Wills Act," 7 Will. IV. & 1 Vict. c. 26, 1837, and the laws with relation to wills amended.\* The present

\* By this act the testator must be above 21, not a lunatic or idiot, not deaf and dumb, not drunk at the time of signing, not an outlawed or unpardoned felon. All kinds of property may be devised. The will must be written legibly and intelligibly, and signed by the testator, or by his direction, in the presence of two or more witnesses, who also must sign, and not be legates.

**PROBATE COURT** (*which see*) was established in 1857. An office for the reception of the wills of living persons was opened in Jan. 1861. See *Thellusson's Will, Legacies, Estate, Succession Duties, Trials*, 1 April, 1897. In 1869 twenty probates of wills or letters of administration were stamped for personal property, each exceeding a quarter of a million; one had a stamp of 21,000l. The Wills Office, removed from Doctors' Commons to Somerset House, was opened 24 Oct. 1874.

**WILMINGTON** (N. Carolina, U.S.) was held by the confederates; resisted severe attacks of the federals in Dec. 1864. Fort Fisher was taken by assault on 15 Jan., and Wilmington was evacuated by the confederates, 22 Feb. 1865.

Earl of Wilmington, first lord of the treasury.

**WINCHESTER** (Hampshire), a most ancient city, whose erection may reasonably be ascribed to the Celtic Britons, with the fabulous date 392 B.C. It was made the capital of the West Saxon kingdom under Cerdic, about 520; and of England by Egbert, 827; it became the residence of Alfred, 879-901. In the reign of William I. London began to rival it; and the destruction of religious houses by Henry VIII. almost ruined it. Several kings resided at Winchester, and many parliaments were held there. Memorials of its ancient superiority exist in the national denomination of measures of quantity, as Winchester ell, Winchester bushel, &c., the use of which has but recently been replaced by imperial measures. The cathedral church was first founded and endowed by Cynegils, or Kenegilsus, the first Christian king of the West Saxons. Becoming ruinous, the present fabric was begun by bishop Walkelyn, the 34th bishop, 1073; repairs to the roof began March, 1896; completed (cost, 12,670l. 10s. 11d.) Dec. 1898. The church was first dedicated to St. Amphibalus, then to St. Peter, and afterwards to St. Swithun, once bishop here. Dedicated to the Holy Trinity by Henry VIII. St. Birinus was the first bishop of the West Saxons, his seat Dorchester, 636; Wina, in 660, was the first bishop of Winchester. The see is

valued in the king's books at 2793*l.* 4*s.* 2*d.* annually. Present income, 6,500*l.* Population, 1881, 17,780; 1901, 20,919; 1909 (est.), 21,423.

**WINCHESTER SCHOOL**, the oldest of our great schools, "Seinte Marie College of Wynchestre," the charter of which is dated Oct. 1382, was founded in 1387 by William (Long) of Wykeham, bishop of Winchester, who had established a school here in 1373. The ancient statutes were revised in 1855; and still further altered by the Public Schools act of 1868. In Nov.-Dec. 1872 there was much published correspondence respecting the *tunding*—the excessive punishment of the boys by *boy prefects*. In May, 1892, it was arranged that the quinquenary of the school should be celebrated 25 July, 1893.

**WINDING-UP ACTS** (to facilitate the winding up the affairs of joint-stock companies which are unable to meet their engagements) were passed in 1848, 1849, 1857, and 1862. Cases are tried by one of the judges of the chancery division.

**WINDMILLS** are of great antiquity, and stated to be of Roman or Saracen invention. They are said to have been originally introduced into Europe by the knights of St. John, who took the hint from what they had seen in the crusades. *Baker*. Windmills were first known in Spain, France, and Germany, in 1299. *Anderson*. Wind saw-mills were invented by a Dutchman, in 1633, when one was erected near the Strand, in London.

**WINDOWS**. There were glass windows in Pompeii, A.D. 79, as is evident from its ruins. It is certain that windows of some kind were glazed so early as the 3rd century, if not before, though the fashion was not introduced until it was done by Benedict Biscop, about 674. Windows of glass were used in private houses, but the glass was imported 1177. *Anderson*.

Window-tax first enacted in order to defray the expense of and deficiency in the re-coining of silver 1695  
The tax increased, 5 Feb. 1746-7; again in 1778; and again on the commutation-tax for tea 1 Oct. 1784  
The revenue derived from windows was in 1840 about a million and a quarter sterling; and in 1850 (to April 5), 1,832,684*l.*

He assessed every county in England to send him workmen. James I. of Scotland was imprisoned here, 1406-23. Several additions were made by Henry VIII. Elizabeth made the grand north terrace; and Charles II. repaired and beautified it, 1676-80. Many foreign royal personages have been entertained at the castle.  Windsor Forest, situated to the south and west of the town of Windsor, was formerly 120 miles in circumference; in 1607 it was 77½ miles round, but it has since been reduced in its bounds to about 56 miles. It now comprises 59,600 acres.  
 Virginia Water and the plantations about it were taken out of the forest.  
 The marshes were drained and the trees planted for William, duke of Cumberland, about 1746; and much was done by George IV., who often resided at the lodge.  
 On the south side is Windsor Great Park; it contains about 3800 acres.  
 The Little Park, on the north and east sides of the castle, contains about 500 acres. The gardens are elegant, and have been considerably improved by the addition of the house and gardens of the duke of St. Albans, purchased by the crown.

**WISSEMBOURG, or WEISENBURG, N.E. France,** in the department of the Lower Rhine, situate on the right bank of the river Lauter, the boundary of France and the Palatinate. It was formerly an imperial city of Alsace, and was seized by Louis XIV. in 1673, and annexed to France by the treaty of Ryswick, 1697. The "lines" of Wissembourg, erected by Villars 1705, were taken by the Austrians and retaken by the French, 1793, after Hoche's victory at Geisberg. On 4 Aug. 1870, the crown-prince of Prussia crossed the Lauter and gained a brilliant but bloody victory over the French (a part of MacMahon's division), storming the lines and the Geisberg. General Abel Douay was mortally wounded, and about 800 prisoners were made. The killed and wounded on both sides appear to have been nearly equal. The German army, composed of Prussians, Bavarians, and Wurtembergers, were, it is said, about 40,000, against about 10,000 French, who fought with desperate bravery.

**WITCHCRAFT.** The Jewish law (*Exodus* xxii. 18), 1491 B.C., decreed, "Thou shalt not suffer a witch to live." Saul, after banishing or condemning witchcraft, consulted the witch of Endor, 1056 B.C. (1 *Sam.* xxviii.) Pope Innocent VIII. issued a bull against witchcraft in 1484. Thousands of innocent persons were burnt, and others killed by the tests applied.

Sir Matthew Hale burnt two persons for witchcraft in 1664.

Seventeen or eighteen persons burnt at St. Oysyth, in Essex, about 1676.

Two pretended witches were executed at Northampton in 1705, and five others seven years afterwards.

In 1716, Mrs. Hicks, and her daughter, aged nine, were hanged at Huntingdon.

Northamptonshire and Huntingdon preserved the superstition about witchcraft later than other counties.

In Scotland, thousands of persons were burnt in the period of about a hundred years. Among the victims were persons of the highest rank, while all orders in the state concurred. James I. even caused a whole assize to be prosecuted for an acquittal. The king published his *Demonologie* in Edinburgh, 1597. The last sufferer in Scotland was at Dornoch in 1722.

In civil actions between party and party, if a man be suborned as a witness on a trial, he must appear in court on pain of 100*l.* to be forfeited to the king, and 10*l.*, together with the damages equivalent to the loss sustained by the want of his evidence to the party aggrieved. Lord Ellenborough ruled that no witness is obliged to answer questions which may tend to degrade himself, 10 Dec. 1802. New act relating to the examination of witnesses passed 13 Geo. III. 1773. Act to enable courts of law to order the examination of witnesses upon interrogations and otherwise, 1 Will. IV. 30 March, 1831. **WIVES**, see *Marriage*. By the Divorce and Matrimonial Causes Act, passed in 1857, the condition of married women has been much benefited. When ill-used they can obtain a divorce or judicial separation; and while in the latter state any property they may acquire is secured to them personally, as if unmarried. By another act passed in 1857, they are enabled to dispose of reversionary interests in personal property or estates. An act to amend the law relating to the property of married women was passed 9 Aug. 1870. By it the separate earnings of a wife were secured to her own use, as well as personal and freehold property bequeathed to her. She may maintain an action at law, and acquires other rights. The husband is declared not liable for debts contracted by his wife prior to marriage, and she may be sued for them. This act was amended in 1874. Husband and wife may be jointly sued for her debts before marriage. By the Matrimonial Causes Act, 1878, a magistrate can grant judicial separation, with maintenance, to a wife suffering from her husband's ill-usage.

*Clitheroe case*.—Miss Emily Hall (born 1866) was married to Mr. E. Houghton Jackson at Blackburn, 5 Nov. 1887. They never lived together; she returned to her friends, and he soon after went to New Zealand. He returned to England, 17 July, 1888. After some correspondence and one interview (16 Jan. 1889) she steadily refused to live with him. Some litigation ensued, and a decree against her was obtained, 30 July, 1889. On 8 March, 1891, Mr. Jackson and others seized her when coming from church at Clitheroe, and carried her off to his house at Blackburn, where she was closely confined in charge of a nurse. By means of a writ of *habeas corpus*, she was brought before the court of appeal, who decided that a husband has no legal power to detain his wife against her will, 19 March. Mrs. Jackson then returned to her friends.

**WOERTH SUR SAUER**, a town in the department of the Lower Rhine, N.E. France. After storming Wissembourg (*which see*) on 4 Aug. 1870, the crown-prince of Prussia, with the 3rd army (about 150,000) marched rapidly forward and surprised part of the French army under Marshal MacMahon, including the corps of Canrobert and

part of that of Faily (about 47,000), and defeated it in a long, desperate, and sanguinary engagement near this place 6 Aug. The battle lasted from 9 a.m. till 4 p.m. The chief struggles occurred in the country round Reichshoffen and in the village of Froeschweiler; the French are said to have charged the German line eleven times, each time breaking it, but always finding a fresh mass behind. The ridge on which Woerth stands was not captured until the French were taken in flank by the Bavarians and Württembergers. Nearly all MacMahon's staff were killed, and the marshal himself, unhorsed, fell fainting into a ditch, from which he was rescued by a soldier. He then, on foot, directed the retreat towards Saverne, to cover the passes of the Vosges. The victory is attributed to the very great numerical superiority of the Germans as well as to their excellent strategy. The French loss has been estimated at 5000 killed and wounded, and 5000 prisoners, 2 eagles, 6 mitrailleuses, 35 cannon, and much baggage. The Germans are stated to have had above 8000 men put *hors de combat*.

**WOLVERHAMPTON** (Staffordshire), an old town formerly named Hamton; owes its present name to the foundation of a college here by Wulfrana, sister of king Edgar, and widow of Aldhelm, duke of Northampton, 996. Edward I. issued his mandate for the destruction of wolves in several counties of England, 1289. Ireland was infested by wolves for many centuries after their extirpation in England; for there are accounts of some being found there so late as 1710, when the last presentment for killing wolves was made in the county of Cork.

Here Charlemagne resided in 806. Here was held the imperial diet before which Martin Luther was summoned, 4 April, 1521, and by which he was proscribed. Luther was met by 2000 persons on foot and on horseback, at the distance of a league from Worms. When Spalatin sent to warn him of his danger, he answered, "If there were as many devils in Worms as there are tiles upon the roofs of its houses, I would go on." He appeared before the emperor, the archduke Ferdinand, six electors, twenty-four dukes, seven margraves, thirty bishops and prelates, and many princes, counts, lords, and ambassadors, 17 April, acknowledged his writings and opinions, and left Worms, in fact, a conqueror. Yet, to save his life, he had to remain in seclusion under the protection of the elector of Saxony for about a year. The *edict* putting him under the ban of the empire was issued 26 May, 1521. Worms was burnt, by order of Louis XIV., 1689, the cathedral excepted; and was taken by the French, under Custine, 4 Oct. 1792. **WOTHLYTYPE**, see under *Photography*.

**WOUNDED IN BATTLE**, see *Geneva Convention*, and *Aid to Sick and Wounded*.

**WOUNDING**. Malicious wounding of another was adjudged death by the English statutes. The Coventry Act was passed in 1671; see *Coventry Act*. By lord Ellenborough's Act, persons who stab or cut with intent to murder, maim, or disfigure another were declared guilty of felony without benefit of clergy. Those guilty of maliciously shooting at another in any dwelling-house or other place, are also punishable under the same statute in the same degree, 43 Geo. III. 1802. This offence is met by some later statutes, particularly the act for consolidating and amending the acts relating to offences against the person, 9 Geo. IV., June, 1828. A Dutch salvage company began operations in Aug. 1857. At the end of 1859, Lloyd's had received 22,162l. 6s. 7d. About 99,893l. recovered; about 1,175,000l. remaining. **WRESTLING**. The art of wrestling dates back many centuries. Its popularity has waxed and waned with varying periods. Towards the end of the 19th century wrestling as a pastime again came into prominence in England by the introduction of Russian, Turkish, and other foreign wrestlers. The principal forms of modern wrestling are the Greco-Roman, the Catch-as-catch-can, and Jiu-jitsu, the latter being the national style in Japan. In Greco-Roman wrestling the opponents are not allowed to hold each other below the waist, and both hips and shoulders of one contestant must be forced to the ground before a fall can be gained. In the Catch-as-catch-can style any hold is allowed, and the placing of both hips and one shoulder of a rival to the mat constitutes a fall. Jiu-jitsu, or the Japanese art of self-defence, has methods peculiarly its own, mainly consisting of locks and holds, a knowledge of which enables a comparatively weak person to defeat and overcome another of greater strength. The city of London police, as well as other forces, have been taught Jiu-jitsu.

**WRITING**. Pictures are considered to be the first essay towards writing. The Egyptian papyri are very ancient, see *Dead, Book of the*. The most ancient remains of writing are upon hard substances, such as stones and metals, used by the ancients for edicts, and matters of public notoriety. Cadmus, the founder of Cadmea, 1493 B.C., is mythically said to have brought the Phœnician letters into Greece. *Vossius*. The commandments were written on two tables of stone, 1491 B.C. *Usher*. The Greeks and Romans used wax table-books, and continued the use of them long after papyrus was known; see *Papyrus, Parchment, Paper*. **WROXETER** (in Shropshire), the Roman city *Uricomun*. Roman inscriptions, ruins, seals, and coins were found here in 1752. New discoveries having been made, a committee for further investigation met at Shrewsbury on 11 Nov. 1858. Excavations were commenced in Feb. 1859, which were continued till May. Large portions of the old town were discovered; also specimens of glass and pottery, personal ornaments and toys, household utensils and implements of trade, cinerary urns, and bones of man and of the smaller animals. A committee was formed in London in Aug. 1859, with the view of continuing these investigations, which were resumed in 1861, through the liberality of the late Beriah Botfield, M.P. The investigations, stopped through want of funds, were resumed for a short time in 1867.

It was given as a principality to the elector of Bavaria in 1803; and by the treaty of Presburg, in 1805, was ceded to the archduke Ferdinand of Tuscany, whose electoral title was transferred from Salzburg to this place. **YARKAND**, the chief town and commercial capital of Eastern Turkestan, situated on the river Yarkand, an affluent of the river Tanim, which enters Lob Nor, in the midst of a fertile oasis, 100 miles S.E. of Kashgar. The town is surrounded by a strong mud wall, inside which are numerous rich and well-watered gardens. The inhabitants are chiefly Persians, who are enterprising merchants. Near to Yarkand are mountains abounding in minerals. Yarkand was visited by Marco Polo, but comparatively little was known of it until Mr. R. Shaw, who resided there for a time, published in 1871 an account of the town and its people. Population about 60,000.

**YARMOUTH, GREAT (Norfolk)**, was a royal demesne in the reign of William I., as appears from Domesday Book, 1086. It obtained a charter from John, and one from Henry III. In 1348, a plague here carried off 7000 persons; and did much havoc again in 1579 and 1664. The parish church of St. Nicholas, founded by bp. Herbert de Losinga, 1101, is one of the largest churches in Great Britain; restored 1847-84. A feature of Yarmouth is its narrow lanes or "rows," 145 in number, which intersect the main streets; a monument, 144 feet high, was erected here to Nelson in 1818. There are numerous public buildings and institutions, some of which are of considerable architectural merit. Yarmouth is the chief seat of the English herring fishery, and the curing of this fish, known as "Yarmouth bloaters," constitutes an important industry; a considerable trade is also carried on in connection with mackerel fishing. Associated with the town is Chas. Dickens' charming creation "Peggotty." Returns one M.P. by act of 1885. Population, 1901, 51,316; 1909 (est.), 53,430.

**YARMOUTH**, a small seaport in the Isle of Wight, 10 miles W. of Newport. Prior to the Reform bill of 1832 it returned two members to parliament. The name also of a seaport in *Nova Scotia*, and the chief shipbuilding centre of the province; situated 205 miles S.W. of Halifax. Population, 1910 (est.), 7,500.

**YASHGAR**, a country, Central Asia; Yakoob, its able despotic chief, was contending with China and Russia, 1875.

**YEAR.** The Egyptians, it is said, were the first who fixed the length of the year.

The Roman year introduced by Romulus, 753 B.C.; corrected by Numa, 713 B.C.; and again by Julius Caesar, 45 B.C. (see *Calendar*).

The solar or astronomical year was found to comprise 365 days, 5 hours, 48 minutes, 51 seconds, and 6 decimals, 265 B.C.

The lunar year (twelve lunar months, or 354 days, 8 hours, 48 minutes) was in use amongst the Chaldeans, Persians, and Jews. Once in every three years was added another lunar month, so as to make the solar and the lunar year nearly agree. But though the months were lunar, the year was solar; that is, the first month was of thirty days, and the second of twenty-nine, and so alternately; and the month added triennially was called *Ve-Adar* or the second *Adar*. The Jews afterwards followed the Roman manner of computation.

The sidereal year, or return to the same star, is 365 days, 6 hours, 9 minutes, 11 seconds.

The Jews dated the beginning of the sacred year in March, and civil year in September; the Athenians began the year in June; the Macedonians on 24 Sept.; the Christians of Egypt and Ethiopia on 29 or 30 Aug.; and the Persians and Armenians on 11 Aug. Nearly all Christian nations now commence the year on 1 January.

In France, the Merovingian kings began the year with March; the Carolingians sometimes began the year with Christmas, 25 Dec.; and sometimes with Easter, which, being a movable feast, led to much confusion. Charles IX. of France, in 1564, published an arret, the last article of which ordered the year for the time to come to be constantly and universally begun, and written on and from 1 January.

The beginning of the year has been reckoned from the day celebrating the birth of Christ, 25 Dec.; his circumcision, 1 Jan.; his conception, 25 March; and his resurrection, Easter.

The English began their year on the 25th of December, until the time of William the Conqueror. This prince having been crowned on 1 Jan. gave occasion to the English to begin their year at that time, to make it agree with the then most remarkable period of their history. *Stow*. Until the act for altering the style, in 1752 (see *Style*), when the year was ordered to begin on Jan. 1, it did not legally and generally commence in England until 25th March. In Scotland, at that period, the year began on the 1st of January. This difference caused great practical inconveniences, and January, February, and part of March sometimes bore two dates, as we often find in old records, 1745-1746, or 1745-6, or 1745. Such a reckoning often led to chronological mistakes; for instance, we popularly say the "revolution of 1688," as that event was completed in February, 1688, according to the then mode of computation; but if the year were held to begin, as it does now, on the first of January, it would be the revolution of 1689.

The year in the northern regions of Siberia and Lapland is described in the following calendar, given by a traveller—"23 June, snow melts. 1 July, snow gone. 9 July, fields quite green. 17 July, plants at full growth. 25 July, plants in flower. 2 Aug., trees ripe. 10 Aug., plants shed their seed. 18 Aug., snow." The snow continues upon the ground from 18th Aug. of one year to 23rd June of the year following, being 309 days out of 365; so that while the three seasons of spring, summer, and autumn are together only fifty-six days, or eight weeks, the winter is of forty-four weeks' duration in these countries.

See *New Style*, *Photius*, *Year*, *Sidereal Year*, *Mohammedanism*, *French Revolution*, &c. *Chaldea*.

**YEAR OF OUR LORD**: see *Ann. Domini*.

**YEAR OF THE REIGN**. FROM THE TIME OF WILLIAM THE CONQUEROR, 1066, the YEAR OF THE SOVEREIGN'S REIGN HAS been given to all public instruments. The king's patents, charters, proclamations, and all acts of parliament have since then been generally so dated. The same manner of dating is used in most of the European states for all similar documents and records; see *List of Kings under Kings*.

**YEAR AND A DAY**. A SPACE OF TIME IN LAW, and in many cases establishes and fixes a right; as in an estray, on proclamation being made, if the owner does not claim it within the time, it is forfeited. The term arose in

the Norman law, which enacted that a beast found on another's land, if unclaimed for a year and a day, belonged to the lord of the soil. It is otherwise a legal space of time.

**YEAR-BOOKS** contain reports in Norman-French of cases argued and decided in the courts of common law. The printed volumes extend from the beginning of the reign of Edward II. to nearly the end of the reign of Henry VIII., a period of about 220 years; but in this series there are many omissions. These books are the first in the long line of legal reports in which England is so rich, and may be considered as, to a great extent, the foundation of our unwritten law, "*Lex non scripta*." In 1863 *et seq.* various year-books of Edward I. (1292-1304) edited by Mr. A. J. Horwood, for the series of the Chronicles and Memorials, were published at the expense of the British government.

**YEAST**, a substance causing fermentation, was discovered by Cagniard de la Tour and Schwann, independently, in 1836, to be a vegetable cell or fungus.

**YELLOW FEVER**, an American pestilence, made its appearance at Philadelphia, where it committed great ravages, 1699. It appeared in several islands of the West Indies in 1732, 1739, and 1745. It raged with unparalleled violence at Philadelphia in Oct. 1762; and most awfully at New York in the beginning of Aug. 1791. This fever again spread great devastation at Philadelphia in July 1793; carrying off several thousand persons. *Hardie*. It again appeared in Oct. 1797; and spread its ravages over the northern coast of America, Sept. 1798. It reappeared at Philadelphia in the summer of 1802; and broke out in Spain, in Sept. 1803. The yellow fever was very violent at Gibraltar in 1804 and 1814; in the Mauritius, July 1815; at Antigua, in Sept. 1816; and it raged with dreadful consequences at Cadiz, and the Isle of St. Leon, in Sept. 1819. A malignant fever raged at Gibraltar in Sept. 1828, and did not terminate until the following year. Yellow fever raging in the southern of the United States, Sept. Oct. 1828; at Memphis, autumn, 1879; in Florida (specially in Jacksonville) and other southern states, autumn 1888. Mr. R. A. Proctor, the astronomer, died of it at New York on his way from Florida to England, 12 Sept. 1888; the epidemic abating Oct. 1888; 4,583 cases, and 396 deaths in Jacksonville to Nov. 17, 1888; slight outbreak, with some deaths, July-Sept. 1899; and at Senegal, autumn, 1900; Messrs. Reed, Carroll, and Agromonte investigate into the cause of the fever in Cuba during 1900, and finally prove the disease to be conveyed by a species of mosquito (*Culex fasciatus*), reported Feb. 1901.

**YELLOWSTONE NATIONAL PARK**, about 3300 square miles, in territory of Wyoming. It includes Yellowstone lake, about 330 square miles, with numerous geysers, volcanic and other grand natural phenomena, rugged mountains, forests, meadows, rivers, and much beautiful scenery. Its formation was authorised by congress in March, 1872.

**YEMEN**, a province of Asiatic Turkey, on the Red Sea, the Arabia Felix of the Romans; see *Arabia*.

**YENIKALE**, see *Azoff*.

**YEOMANRY**, see under *Territorials*.

**YEOMEN OF THE GUARD**, a peculiar body of foot guards to the king's person, instituted at the coronation of Henry VII. 30 Oct. 1485, which

originally consisted of fifty men under a captain. They were called *haef-eaters*, a corruption of *buffetiers*, being attendants on the king's buffet or sideboard; see *Battle-Axe*. They were of a larger stature than other guards, being required to be over six feet in height, and were armed with arquebuses and other arms. The band was increased by Henry's successors to one hundred men, and seventy supernumeraries; and when one of the hundred died, it was ordered that his place should be supplied out of the seventy. They were clad after the manner of king Henry VIII. *Ashmole's Instit.* This is said to have been the first permanent military band instituted in England. John earl of Oxford, was the first captain in 1486. *Beats-on's Pol. Index*.

**YEOVIL**, a municipal borough in Somerset, situated on the river Yeo, 22 miles S.E. of Bridgewater and 40 miles S. of Bristol. The parish church, St. John's, called the "Lantern of the West," is a fine cruciform structure of the perpendicular style, dating from the 15th century, restored 1864. The town was formerly noted for its woollen industry; at the present time (1903) it carries on an extensive trade in gloves manufactured here. In 1449 a great fire destroyed 117 houses. Population, 1901, 9,861; 1910 (est.), 10,125.

**YERMUK** (Syria). Near here the emperor Heraclius was totally defeated by the Saracens, after a fierce engagement, Nov. 636. Damascus was taken, and his army expelled from Syria.

**YEW-TREE** (*Taxus*). The origin of planting yew-trees in churchyards was (these latter being fenced) to secure the trees from cattle, and in this manner preserve them for the encouragement of archery. A general plantation of them for the use of archers was ordered by Richard III. 1483. *Stow's Chron.* Near Fountains Abbey, Yorkshire, were seven yew-trees, called the Seven Sisters, supposed to have been planted before 1088; the circumference of the largest thirty-four feet seven inches round the trunk. In 1851 a yew-tree was said to be growing in the churchyard of Gresford, North Wales, whose circumference was nine yards nine inches, being the largest and oldest yew-tree in the British dominions; but tradition states that there are some yews in England older than the introduction of Christianity. The old yew-tree mentioned in the survey taken of Richmond palace in 1649, is said to be still existing.

**YEZDEGIRD**, or **PERSIAN ERA**, was formerly universally adopted in Persia, and is still used by the Parsees in India, and by the Arabs, in certain computations. This era began on the 26th June, 632, when Yezdegird was elected king of Persia. The year consisted of 365 days only, and therefore its commencement, like that of the old Egyptian and Armenian year, anticipated the Julian year by one day in every four years. This difference amounted to nearly 112 days in the year 1075, when it was reformed by Jekaleidin, who ordered that in future the Persian year should receive an additional day whenever it should appear necessary to postpone the commencement of the following year, that it might occur on the day of the sun's passing the same degree of the ecliptic.

**YEZIDIS**, an eastern tribe, living near the Euphrates, visited by Mr. Layard in 1841: see *Devil Worship*.

**YIDDISH**, a kind of jargon Hebrew spoken by the lower class of Jews. There are two daily

papers published in Yiddish in the east of London, the *Jewish Express* and the *Jewish Journal*, each one half-penny.

**YNGLINGS** (youths, or off-shoots), descendants of the Scandinavian hero Odin, ruled Sweden till 830, when the last of the pontiff kings, Olaf Traetela, being expelled, led to the foundation of the Norwegian monarchy.

**YOKE** is spoken of as a type of servitude. The ceremony of making prisoners pass under it was practised by the Samnites towards the Romans, 321 B.C.; see *Caudine Forks*. This disgrace was afterwards inflicted by the Romans upon their vanquished enemies. *Dufresnoy*.

**YORK** (N. England), a town of the Brigantes, named Eborac, settled by the Romans during the second campaign of Agricola, about 79, and named *Eboracum* or *Eburacum*, and became the metropolis of the north. See *Population*.

1892. Prince George of Wales created duke of York,

See under *Wales* (princes of).

**YORK, ARCHBISHOPRIC OF.** The most ancient metropolitan see in England, being, it is said, so made by king Lucius about 180, when Christianity was first partly established in England. The bishop Eborius was present at the council of Arles, 314. The see was overturned by the Saxons, and was revived by pope Gregory on their conversion, and Paulinus is said to have been consecrated archbishop, 21 July, 625. York and Durham were long the only two sees in the north of England, until Henry I. erected a bishopric at Carlisle, and Henry VIII. another at Chester. York was the metropolitan see of the Scottish bishops; but during the time of archbishop Nevil, 1464, they withdrew their obedience, and had archbishops of their own. Much dispute arose between the two English metropolitans about precedence, as by pope Gregory's institutions it was thought he meant, that whichever of them was first confirmed, should be superior: appeal was made to the court of Rome by both parties, and it was determined in favour of Canterbury. The archbishop of York was allowed to style himself primate of England, while the archbishop of Canterbury styles himself primate of *all* England. The province of York now contains the dioceses of York, Carlisle, Chester, Durham, Sodor and Man, Manchester, Liverpool, Newcastle, Wakefield and Ripon (*which see*). York has yielded to the church of Rome eight saints and three cardinals, and to England twelve lord chancellors, two lord treasurers, and two lord presidents of the north. It is rated in the king's books, 39 Henry VIII. 1546, at 1600*l.* 19*s.* 2*d.* per annum *Beatson*. Present income 10,000*l.*

**YORK MINSTER** (dedicated to St. Peter). The first Christian church erected here, which appears to have been preceded by a Roman temple, was built by Edwin, king of Northumbria, of wood, about 625, and of stone about 635. It was damaged by fire in 741, and was rebuilt by archbishop Albert, about 780. It was again destroyed by fire in the year 1069, and rebuilt by archbishop Thomas, of Bayeux. It was once more burnt down in 1137, with St. Mary's abbey, and 39 parish churches in York. Archbishop Roger built the choir, 1154-81; Walter Gray added the south transept in 1227; John de Romayne, the treasurer of the cathedral, built the north transept in 1260. His son, archbishop Romanus, laid the foundation of the nave in 1291. In 1330, William de Melton built the two western towers, which were finished by John de Birmingham in 1342. Archbishop Thoresby, in 1361, began to rebuild the choir, in accordance with the magnificence of the nave, and he also rebuilt the lantern tower. The minster was set on fire by Jonathan Martin, a lunatic, and the roof of the choir and its internal fittings destroyed, 2 Feb. 1829; the damage, estimated at 60,000*l.*, was repaired in 1832 under sir Robert Smirke. An accidental fire broke out, and in one hour reduced the belfry to a shell, destroyed the roof of the nave, and much damaged the edifice, 20 May, 1840. This was restored by Sidney Smirke, at a cost of 23,000*l.*, 1841.

**YORK** (Upper Canada), founded in 1794; since 1834 named Toronto. In the war between the United States and Great Britain, the United States' forces made several attacks upon the province of Upper Canada, and succeeded in taking York, the seat of the government, 27 April, 1813; but it was soon afterwards evacuated by the Americans.

**YORKSHIRE** Exhibition of Arts and Manufactures, opened at Leeds, by the duke of Edinburgh, 13 May, 1875.

**YORK TOWN** (Virginia, United States). Lord Cornwallis had taken possession of York town in Aug. 1781; but after sustaining a disastrous siege, he was obliged to surrender his army, consisting of about 7000 men, to the allied armies of France and America, under the command of general Washington and count Rochambeau, 19 Oct. 1781. This mischance was attributed to sir Henry Clinton, who had not given the garrison the necessary succour they expected; and it mainly led to the close of the war. The centenary was celebrated 16 Oct. 1881 *et seq.* On 19 Oct. the British flag was saluted generally. The town was strongly fortified by the confederates in the American civil war, but surrendered to McClellan, May, 1862.

**YOUNG ENGLAND**, a name given to a number of young tory gentlemen earnestly opposed to the repeal of the corn laws and other liberal measures, and very desirous of reviving the old relations between the upper and lower classes mixing in rural sports, &c., yet preserving the due distinctions (1842-6). Lord John Manners (duke of Rutland, 1888), and the hon. G. Smythe, were eminent leaders, and their ideas were favoured by Mr. Disraeli (lord Beaconsfield) in his novel "Coningsby," published 1844. Duke of Rutland died, aged 87, 4 Aug. 1906.

**YOUNG MEN'S CHRISTIAN ASSOCIATION**, for improvement of young men by means of classes, meetings, &c., founded 1844; jubilee celebrated, with the 13th triennial international conference in London; about 1,700 delegates present; sir George Williams, president (died 6 Nov. 1905). Exeter-hall, Strand, was bought for the association about July, 1880. It met there, 29 March, 1881. In 1902 there were 7,505 centres of the association in various parts of the world, numbering 620,721 members; in the United Kingdom 1,512 centres, 120,550 members; in London 65 centres with 13,000 members. In 1910 there are 8,056 branches throughout the world; the membership is 859,621, and the value of buildings upwards of 11,853,242*l.* The new headquarters building of the central Y.W.C.A. is now being erected in the Tottenham Court-road at a cost of 175,000*l.* The **YOUNG WOMEN'S CHRISTIAN ASSOCIATION**, founded 1855. Patron: Her Majesty the Queen. The Y.W.C.A. exists to promote the spiritual, intellectual, social, and physical welfare of young women of all denominations. To this end it has homes (residential and holiday) all over the world; and club rooms open every evening, in which classes and lectures of various kinds are held. It is said to have been known in China also, and is noticed by European writers as early as 1231; though the method of extracting it from the ore was unknown for nearly five hundred years after. The metal zinc is mentioned by Paracelsus (died 1541). A mine of zinc was discovered on lord Ribblesdale's estate, Craven, Yorkshire, in 1809.
